#17 & #18 NOT Available in Kit Form.					
Special Stainless Dome Nuts 10/32 (for securing butt caps), \$.20 ea. Pieces of steel sent will be for designated blade lengths - after forging. We etch "Kit" on finished blades - to differentiate from knives we complete.					THE ABOVE PRICES INCLUDE POSTAGE AND HANDLING
For prices on sheaths to fit above blades, see our catalogue. For stainless steel blades (available fully finished, only) add \$7.00, blades to 5"; \$9.00 for 6"-8". (See catalogue for available models.)					
Notice: We offer these parts for those who wish to construct their own knives; please do not ask us to supply Hilts, Butt Caps, Handles, or Tangs, drilled, inletted, shaped, threaded, or fitted (if we did these operations, we may as well finish the entire knife). We do want to point out that there is some hazard in these operations and only a skilled shop worker should attempt them.					
Order can usually be sent 8 to 12 weeks after it is received.					Complete Treatise on Knife Assembly by Tommy Bish of Gun World, available in folder form \$.25
