Performance

We insist all of our knives deliver extraordinary performance for their asking price. In other words, "they must deliver their money's worth".

In order to achieve this goal, we are vitally interested in all the elements that are critical to performance.

When it comes to the blade, these include profile, thickness, blade geometry, edge geometry, steel and heat treatment. Every one of these factors is studied in great detail to arrive at the optimum combination for a specific use. If the knife is a folder, we concentrate on the locking mechanism to ensure the strongest, safest construction. For handles, we strive to develop the perfect mix of materials and ergonomics to offer the most comfortable secure grip available. Above all, we TEST what we make! Rigorous testing is the only way to ensure we get the level of performance we demand.

(Right) Manila rope is very tough on a knife edge. Blades that can repeatedly cut this rope will last indefinitely under normal field use.

Steel & Heat Treatment

Carbon V®

Some of our Cold Steel knives are made from Carbon V®, a high carbon, low alloy cutlery grade steel. This steel is superior in performance to most other steels due to its chemistry and also because of the close controls that we maintain at every stage of the manufacturing process. These controls begin at the steel mill where Cold Steel specifies the desired microstructure of the steel. Once smelted, each steel shipment is microscopically checked for structural quality, cleanliness and chemical content by an independent metallurgist not in the mill's employ. The blades are then blanked parallel to the rolling direction of the steel plate to optimize grain flow along the length of the blade. The final step is a precise heat treatment sequence that was developed by Cold Steel specifically for this custom steel. This heat treatment process is one of our most highly guarded trade secrets. It was arrived at over several years by using an exhaustive series of practical and metallurgical tests and observations.

Overall, we believe that attention to detail in every phase of the manufacturing process is the primary reason for the superiority of our blades.

San Mai III®

San Mai means "three layers". It is the term given to the traditional laminated blades used by the Japanese for swords and daggers. Laminated construction is important because it allows different grades of steel to be combined in a single blade. A simple way to think of this type of construction is to imagine a sandwich: The meat center is hard, high carbon steel and the pieces of bread on either side are the lower-carbon, tough side panels. The edge of the blade should be hard to maximize edge holding ability, but if the entire blade was hard it could be damaged during the rigors of battle. For ultimate toughness the body of the blade must be able to withstand impact and lateral stresses. Toughness is generally associated with "softness" and "flexibility" in steel, so that surprisingly, if an entire blade was made "tough" the edge would not be hard enough to offer superior edge holding. San Mai III® provides a superior blade with hard (higher carbon) steel in the middle for a keen, long lasting edge and tougher (lower-carbon) steel along the sides for flexibility. This laminate is 25% stronger than the incredibly tough AUS8A stainless.

AUS 8A Stainless

The words "stainless steel" are misleading, because, in fact, all steel will stain or show discoloration if left in adverse conditions for a sufficient time. Steel is made "stainless" by adding Chromium and reducing its Carbon content during the smelting process. There is a serious performance trade-off with stainless steel: As the Chrome increases and the Carbon decreases, the steel becomes more "stainless". But it also becomes more and more difficult to sharpen, and the edge-holding potential is seriously impaired. This is usually why most stainless knives are rarely razor-sharp and quickly lose the little edge they have. In contrast, at Cold Steel® we use AUS 8A, a high carbon, low chromium steel that has proven, over the last 15 years, to be the ultimate compromise between toughness, strength, edge holding and resistance to corrosion.

Shaving is a quick indicator of sharpness. Most factory and custom knives do not exhibit this sharpness when first used.

All Cold Steel® knives are shaving sharp, right out of the box!

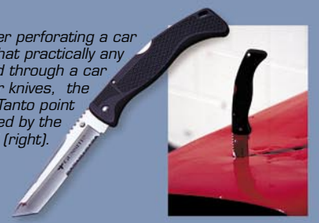
Warranty

We stand behind our knives 100%. We subject them to the highest standards in the industry and strive to make each one as perfect as possible. Our fixed blade sheath knives have a 5 year warranty to the original owner against defects in materials or workmanship. Our folding knives are warranted for one year.

ANY knife can be broken or damaged if subjected to sufficient abuse and all knives eventually wear out and must be replaced. Most of the tests shown here are dangerous and they should not be duplicated. These destructive tests constitute gross abuse of a knife. Duplicating them will void your warranty.

Tests of Strength & Sharpness

The Gunsite™ Folder perforating a car door. Critics say that practically any knife can be stabbed through a car door... but unlike other knives, the Gunsite's™ reinforced Tanto point is remarkably unaffected by the ordeal (right).



(Below) Retaining a fine edge while repeatedly cutting pine (wood) indicates superior fine edge retention.

(Below) The Vaquero Grande™ was flexed in a vite to nearly 45°. Most knives shatter well before they reach this point.

(Right) Hammering a knife into hard maple and then snapping it out sharply to the side is an extreme test of point strength. Cold Steel® is undamaged.

PROOF Seeing is Believing!

Cold Steel® makes promises. Other knife manufacturers do the same. What sets Cold Steel® apart? It's quite simple. To back up our claims, we subjected our knives to the most strenuous series of tests imaginable.

In other words, we put our videotape where our mouth is. Cold Steel's® "Proof" shatters the claims of other manufacturers.

#VC90 PROOF

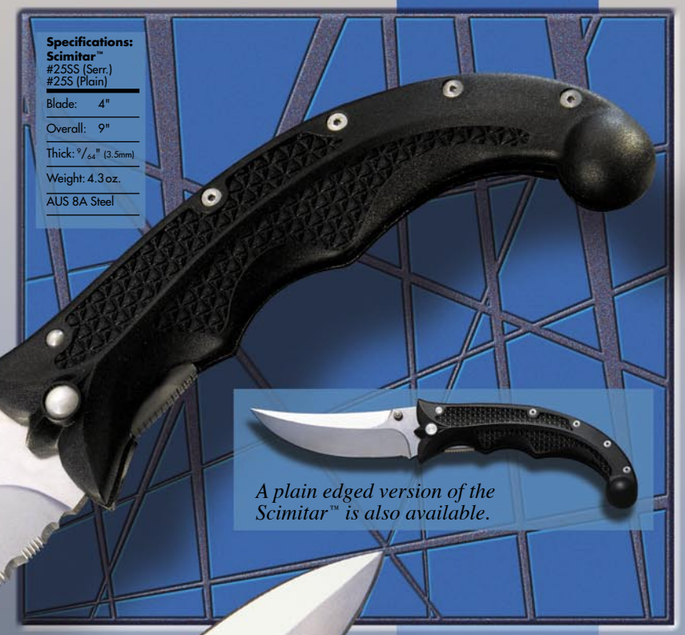
Scimitar™

Sharp as Saladin's legendary blade, the sleek, classically curved Cold Steel Scimitar™ places the power of the sword in your pocket. Our craftsmen have captured the timeless quality of superior cutlery and united it with the finest in modern materials. The result is a dazzling, high impact folding linerlock like no other knife available.

The Scimitar™ blade is hollow ground from super tough AUS 8A stainless steel honed to razor sharpness and features the famous curve of its ancient namesake. It has been painstakingly designed to facilitate the most effective cutting stroke known to man, the draw cut. The blade also has a needle sharp point which pierces at the slightest touch.

Superior engineering combines traditional appeal with the latest Western technology in the contoured Zytel® and steel frame handle designed exclusively by Lynn Thompson for the Cold Steel® Scimitar.™ The pistol grip handle allows a forward, reverse or palm reinforced grip while finger grooves, checkering, a pocket clip and hard-hitting pommel contribute to its ease of carry and rock steady grip.

The Scimitar™ comes with a Steel pocket clip.



A plain edged version of the Scimitar™ is also available.

Triple Action Folding Knives

Packing an awesome punch, Cold Steel's Triple Action™ Folding Knives prove that formidable power and strength in a folding knife do not require the weight of an anvil. With a convenient pocket clip, and a closed length of only 5 inches, the 3.5 ounce Triple Action™ Folders are a dynamite innovation.

Cold Steel is the first to offer a high quality folder featuring AUS10A stainless steel providing superb cutting ability with the finest combination of strength and flexibility.

The aircraft grade aluminum handle is roll engraved with a distinctive pattern, giving the Triple Action™ an exceptional finished look.

The Triple Action includes a steel pocket clip.

What is AUS 10A?

Cold Steel's commitment to producing the finest cutlery in the world starts with procuring the finest materials. Five years ago we discovered AUS 10A, a high carbon stainless made in Japan.

We tested AUS 10A, along with every other Japanese-made stainless suitable for knifemaking. Some steels showed promise, but weaknesses became apparent when we flexed them in a vise and began cutting rope.

The only equal to our AUS 8A in strength and toughness was AUS 10A; however, the big breakthrough was that it exceeded AUS 8A by an honest 20% in edge holding ability, giving it a wide performance advantage over ATS-34, ATS-55 and 440V.

The superior lock is as tight as a bank vault.

Voyager® Series

Due to their light weight and convenience, Zytel® handled lockbacks have gained enormous popularity over heavier, traditional lockbacks with their metal bolsters and wooden scale handles. Our Voyager® Series is the new generation of these ultra-light knives and are sure to be the standard by which others are judged for years to come!

The Voyager® Series are made from the same premium stainless steel that goes into our famous Tanto. They feature precision milled and hand fitted parts with extra stiff springs. This provides a lock that is safer and stronger than most traditional folders. The blades are extremely wide and ground thin at the edge for tremendous shearing potential. This thin edge allows us to hone the blade to astounding sharpness. Plus, the cutting surface is continuously curved along its entire length for the most efficient possible slicing action. Because of the high carbon content in the stainless steel, you'll find that the sharpness really lasts a surprisingly long time.

If you like serrations, you'll really appreciate our exclusive pattern. It offers the aggressive ripping action of serrated teeth, but with a twist. Our design features groups of very small teeth separated by wide, shallow arcs. This results in the benefits of both a plain and a serrated edge, so that the knife still cuts smoothly through almost any material.

The Voyager® Series offers all the advantages of the latest in lockback construction technology including lightening-quick one-handed opening, light weight and strength, yet without the necessity for unsightly humps or holes in the blade. The result is an appealing look with very modern styling. Every detail has been designed for maximum performance from the reinforced pivot pin and integral clip, to the grooved thumb shelf on the back of the knife for extra traction. Plus, the handle offers a superbly comfortable non-slip grip and houses the blade in a sleek, super-light package that can be carried all day without effort.

As tools, these lightweight, super sharp knives are appropriate in almost any environment from hunting and camping, to hiking and general utility chores. They can also readily fill specialty functions such as a boat or river knife, a chute knife or demanding police/survival/rescue applications.

Tuff-Lite™ Voyagers®

Tough enough to do the job and light enough to be handy, the Cold Steel® Tough-Lite's™ are there when you need them. They come complete with a lanyard hook so they easily attach to any keychain, belt loop, zipper pull, or neck lanyard.

Quality counts, even in small packages, so we made the Tuff Lite™ Voyagers® with reinforced pivot pins and lockwork that is capable of holding more than 40 pounds! The Zytel® handled Tough Lites are flat and light enough to be carried all day without effort in the pockets of even tropical weight pants.

Specifications: Voyager Series

AUS 8A Stainless Steel with Zytel® handles.
Except for the Tuff-Lites, all handles feature integral pocket clips.

What Should You Expect From A Cold Steel Folder?

Sharpness

The true measure of a knife's sharpness and cutting power is its ability to cut free hanging Manila rope. The abrasive nature of the hemp fibers offer an excellent test of a knife's edge holding ability. Most of Cold Steel folder's have been tested in this fashion.

Strength

Cold Steel folders have been tested (and proven) to withstand more weight pressure on their locks than 99% of our competitor's like models.
The photo below illustrates how these tests are done. Note how far the weight is placed from the pivot point, putting the lock under maximum strain. If you value your fingers, lock strength should be a primary consideration when purchasing a folding knife.

The tests shown above are documented in our video "PROOF". These tests are dangerous and should not be duplicated. They constitute gross abuse of a knife. Duplicating them will void your Cold Steel warranty.

Test Results for Cold Steel Voyagers®

Blade Style	Weight Pressure	Severed Manila Rope
Tuff-Lite	40lbs.	N/A
Med. Clip Pt.	70lbs.	1"
Lg. Tanto Pt.	100lbs.	1 3/4"
X Lg. Clip Pt.	125lbs.	2"

There are 14 folders in the Voyager® Series. Each is a testament to strength, sharpness, and outstanding craftsmanship.

With the exception of the Tuff-Lites," all the Voyagers feature one-handed opening and an integral belt clip for easy carry.

Gunsite™ Folders

Cold Steel is right on target with the Gunsite™ Folders—the first authorized and official knives of the renowned Gunsite™ Training Center, one of the leading U.S. providers of training in firearms education. Intelligently styled, these tanto folders are as imposing as the Gunsite™ Center's famed black raven trademark.

Featuring a versatile "50/50" plain and serrated edge style with extraordinarily strong locking mechanisms (the larger model can hold up to 130 pounds!), the Gunsite™ Folders are ready for a variety of tactical missions.

Like our Voyagers®, the Gunsite™ folders have an all Zytel® handle with and integral pocket clip for easy carry.

Specifications:

	#34GXTH (Gunsite™)	#34GLTH (Gunsite™ II)
Blade:	5"	4"
Handle:	6"	5 1/8"

Weight:	5.4oz.	3.5oz.
AUS 8A Steel.	Zytel® Handle	

Land & Sea Rescue™

When someone's life is in danger, there is often not enough time to fumble around trying to open a Swiss Army® or "tool" type knife and saw frantically away in a desperate bid to free them. You see, those types of knives have blades that are just too short, narrow and dull to immediately sever thick, tough, or fibrous material like rope, belts, straps, cables or webbing.

That's why Cold Steel designed the Land/Sea Rescue™ knife. In emergencies it can be opened in the blink of an eye with either hand. Once it's locked open it can cut with the fury of a chain saw on account of its big, wide, flat ground blade and thin, razor sharp serrated edge. What's more, unlike other knives, it features a semi-rounded "sheep's foot" point that is less likely to injure accident victims when cutting away seat belts or clothing. The Land & Sea/Rescue™ knives feature an integral pocket clip for easy carry.

Specifications:
Land & Sea/Rescue™

	#34RLS (Black)	#34RLSB (Blue)

Specifications:
ER1
#32NS

Blade:	3"
Overall:	7"
Thick:	5/64"
Weight:	1.6 oz.
AUS 8A Stainless.	

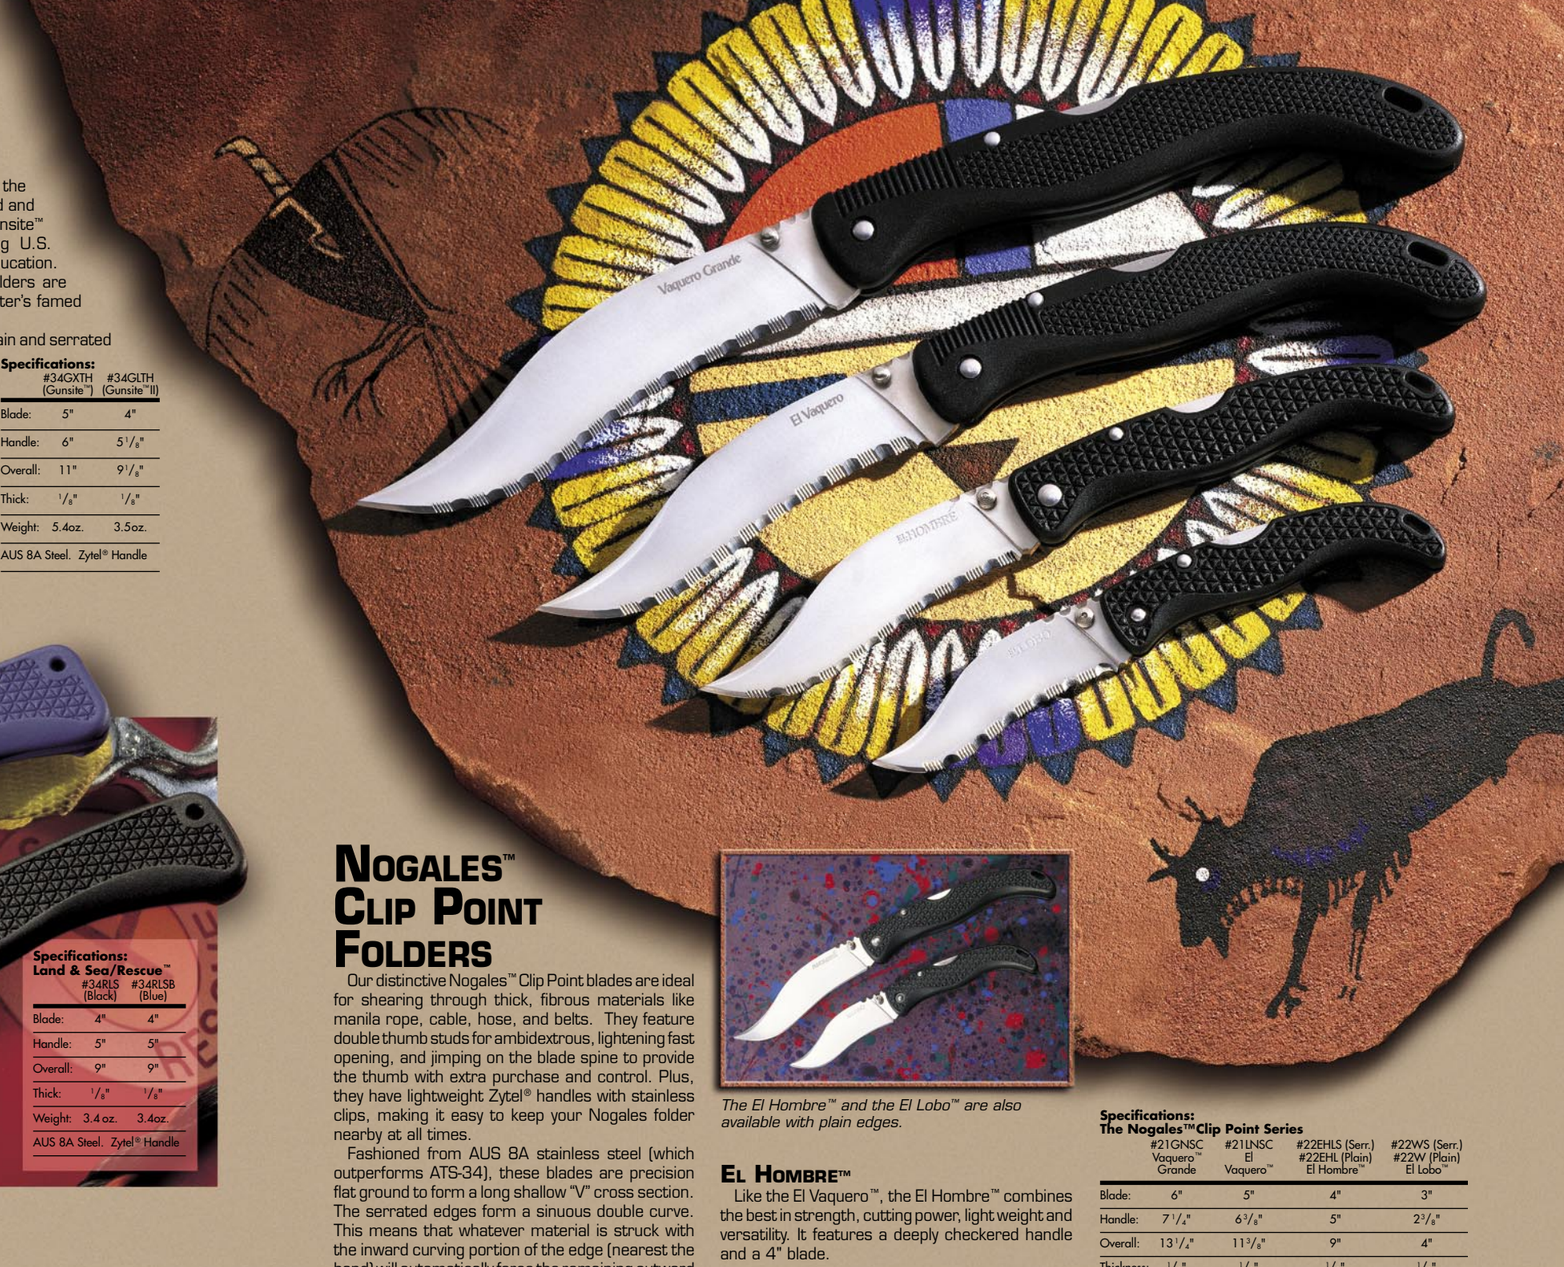
ER1

Emergency Rescue Knife

Emergency Rescue is a regular occurrence for Police, Fire and Paramedic personnel and emergency situations on land and sea often require an extra sharp knife. The ER1 was designed with this in mind. It features a patented sliding lock mechanism that offers an easily accessible blade in a very safe package. When closed, the razor-sharp blade is locked securely inside a tough Zytel® housing.

To open: simply slide the button forward until it snaps into place. Once in the open position, the ER1 has been laboratory certified to withstand at least 50 lbs of pressure on the point without collapsing.

The blade is hollow ground and has our exclusive serration pattern for smooth long-lasting cutting power. Like the Land/Sea Rescue knife (above), the ER1 has a "sheepsfoot" point.



Nogales™ Clip Point Folders

Our distinctive Nogales™ Clip Point blades are ideal for shearing through thick, fibrous materials like manila rope, cable, hose, and belts. They feature double thumb studs for ambidextrous, lightening fast opening, and jimping on the blade spine to provide the thumb with extra purchase and control. Plus, they have lightweight Zytel® handles with stainless clips, making it easy to keep your Nogales folder nearby at all times.

Fashioned from AUS 8A stainless steel (which outperforms ATS-34), these blades are precision flat ground to form a long shallow "V" cross section. The serrated edges form a sinuous double curve. This means that whatever material is struck with the inward curving portion of the edge (nearest the hand) will automatically force the remaining outward curved edge entirely through.

Vaquero™ Grande

The overall length of the Vaquero™ Grande gives it big advantages in reach and cutting power. But don't let the oversized dimensions fool you! There is nothing awkward or clumsy about this knife. The 6 oz. Vaquero™ is light for its size and has been carefully sculpted to be as fast and sleek as possible without any sacrifice in strength.

El Vaquero™

The large Vaquero™ offers the same steel, heat treatment, sharpness, fit and finish as the Grande. The only real difference is in size; to accommodate those who value the features of the Grande, but prefer a lighter ride on the waistband or in a pocket.

The El Hombre™ and the El Lobo™ are also available with plain edges.

El Hombre™

Like the El Vaquero™, the El Hombre™ combines the best in strength, cutting power, light weight and versatility. It features a deeply checkered handle and a 4" blade.

El Lobo™

A smaller version of our El Hombre™, with a 3' blade. The "Wolf" is perfect for all your smaller cutting chores.

Specifications:
The Nogales™ Clip Point Series

	#21GNSC Vaquero™ Grande	#21LNSC El Vaquero™	#22EHLS (Serr.) #22EHL (Plain) El Hombre™	#22WS (Serr.) #22W (Plain) El Lobo™

Weight:	5.4oz.	4.1oz.	3.6oz.

AUS 8A Stainless Steel with Kraton® handles. A Concealex® boot/belt sheath is included.

The push knife was first made popular in the U.S. during the 1849 Gold Rush in California. The reason for the success of this knife was a combination of its compact size and unparalleled grip.

Now Cold Steel® is happy to present the finest production push knives in almost 150 years.

Designed for the 21st century, these knives are becoming popular with military personnel around the world because, unlike a revolver or automatic pistol, they never break, malfunction, or run out of ammunition. What's more, they offer "big knife" capabilities in a compact package (2" shorter overall than most boot knives) that can be easily attached to tactical web gear, tucked in a waistband or boot top or strapped to a wrist or ankle.

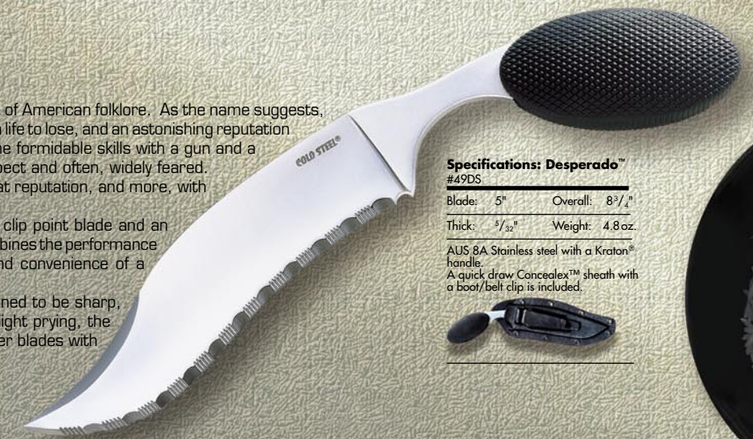
Desperado™

The Desperado of the Old West— a legendary fixture of American folklore. As the name suggests, this was a desperate man, an outlaw, with nothing left in life to lose, and an astonishing reputation to be gained. With this unbeatable attitude, and some formidable skills with a gun and a knife, he became one fierce opponent, worthy of respect and often, widely feared.

Cold Steel proudly offers a knife which lives up to that reputation, and more, with our versatile Desperado!™

The Desperado™ features a serrated, 5" Nogales™ clip point blade and an innovative egg-shaped Kraton® handle. It effectively combines the performance sensibilities of a push dagger with the versatility and convenience of a conventional boot knife.

Special attention was paid to the knife point. Designed to be sharp, yet thick enough to withstand hard impact and even light prying, the Desperado's™ point has a strong advantages over other blades with less pronounced curves.



Specifications: Desperado™ #49DS

Blade:	5"	Overall:	8 3/4"
Thick:	5/32"	Weight:	4.8oz.

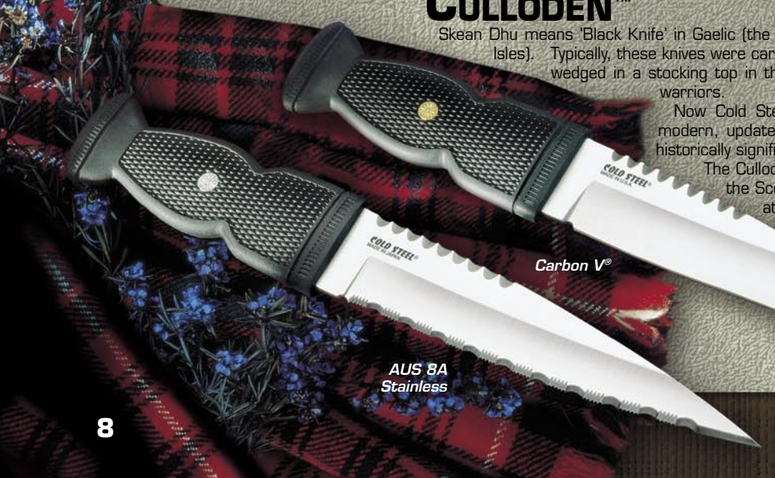
AUS 8A Stainless steel with a Kraton® handle.
A quick draw Concealex™ sheath with a boot/belt clip is included.

Culloden™

Skean Dhu means 'Black Knife' in Gaelic (the ancient language of the British Isles). Typically, these knives were carried covertly on one's person or wedged in a stocking top in the style of the kilt-clad highland warriors.

Now Cold Steel® is pleased to introduce a modern, updated version of this romantic and historically significant knife.

The Culloden™, commemorates by name, the Scottish nation's last heroic battle at Culloden on April the sixteenth, 1746. It offers today's highlander an alternative to the traditional double edged boot knife.



Specifications: Culloden™

Steel:	AUS8A	AUS 8A	San Mai	San Mai	San Mai	San Mai

Sheath: All come with a high quality leather sheath.

Exhibiting an unequaled level of craftsmanship, the knives in the Tanto Series feature a lustrous satin finish on the hollow ground blade bevels and a line grain finish on the flat spine. These two finishes characterize our state of the art grinding technique and accentuate the Tanto's unique appearance.

The Mini Tanto: Complete with all stainless steel fittings, including a traditional oval guard (tsuba), the Mini Tanto is scaled down to the smallest practical size. The result; a perfect boot/belt knife. Minimal weight and size combine with maximum sharpness, cutting power and point strength to outperform much larger knives.

The Tanto: The knife that started the Cold Steel legend. It features a beautiful stainless steel guard and pommel and a virtually indestructible 6" blade.

The Master Tanto: Comparable to the original, except that its blade is San Mai III,® making it approximately 25% stronger.

The Magnum Tanto II: Just two ounces heavier than the Tanto, the Magnum Tanto II provides a full 30% increase in cutting power. Combine that with the visual impact of a tsuba-style (sword) guard and you have perhaps the ideal Tanto. The Magnum Tanto II features a blade made from San Mai III.®

The Magnum Tanto IX and XII: These knives were created in response to popular demand for a longer Tanto. They are available in 9" and 12" blade length in our exclusive San Mai III® laminated steel.

Tai Pan™

The Tai Pan™ embodies all the best features of a classic dagger while minimizing its shortcomings. Most daggers are notorious for thin, easily broken points. In contrast, the Tai Pan™ features a sturdy spear point which is wide and thick enough to resist breaking.

As with the Tanto, the Tai Pan™ features a tapered, black Kraton® handle with a unique flattened oval cross section. Over time, this material and handle shape have proven ideal at preventing the knife from shifting or turning in the hand even under the worst circumstances.

Tai Pan™

Imperial Tai Pan™

Our Imperial version of the Tai Pan™ shares many of the attributes of our regular version, yet differs markedly in its aesthetic styling. In the traditional Japanese way, the Imperial Tai Pan™ features a braided, cord wrapped handle in the centuries-old "cross over" pattern, with a unique underlying base of "Samé" or ray skin.

The razor sharp blade is made from 161-layer San Mai Damascus steel. This rare steel consists of two 80 layer sections laminated around a hard stainless core. The end result is a visually breathtaking and virtually unbreakable blade.

Each Imperial Tai Pan® is serial numbered 001-500 and comes with a signed certificate of authenticity.

Imperial Tai Pan™

Handle:	Kraton®	Cord Wrapped Samé (Ray Skin)

300 Series Stainless guards, bolsters, and pommels. (The Imperial Tai Pan features mirror polishing on these areas.) Includes a high quality leather sheath.

Hamidashi
(Small Guard Tanto)

Formidably beautiful and elegantly functional, the Cold Steel Hamidashi is the most authentic Japanese-made Tanto since the second World War! It features Shiro-2 Goh blade steel (the closest to "Tomahagne" currently available), and a time-honored heat treatment that uses a special clay to cover part of the blade as heat is applied. This extravagant method generates a hardened edge with a softer spine, making the blade able to withstand hard blows. A by-product of this is the distinctive irregular line near the edge of the blade called the "Hamon."

The traditional scabbard (finished in black lacquer) and hilt are constructed from Magnolia wood, and the Tsuba, Fuchi, and Kashira are all made from black iron. The hilt is covered in Samé (ray skin) and tightly wrapped in black braided cord in the customary pattern.

Hamidashi

Shira-Zaya
(White Scabbard)

From feudal Japan, to the present age, fine Tanto blades not intended for immediate use were often kept in "preservation scabbards" of plain white wood with a matching guard-less hilt. This mounting style was called Shira-Zaya. Cold Steel is proud to offer our outstanding Tanto blade in this uniquely Japanese design.

Shira-Zaya

Specifications: Traditional Tanto Series

	#50A Hamidashi	#51A Shira-Zaya
Blade:	11"	11"
Handle:	6 1/2"	6 1/2"
Overall:	17 1/2"	17 1/2"
Thick:	1/5"	1/5"
Weight:	12.6oz.	13.6oz.

The sheaths come with a traditional purple silk cover.

Both knives come complete with the customary bottle of clove oil, a powder bag and a sheet of white wiping paper. The knives are packaged in a unique wooden box that converts into an impressive looking display stand.

Kobun™

In Japan, the underworld meaning of "Kobun" is "soldier" and that's exactly what we have designed this knife to do; be a good soldier.

Most boot knives are notorious for their paper thin, easily bent or broken points. In contrast, the Kobun's™ acute point is highly resistant to this because it is reinforced by the full thickness of the blade's spine which runs almost to the very tip.

The Kobun's handle was designed to offer minimum bulk and maximum grip. Its cross section was made as thin as possible, then deeply contoured and checkered to resist turning or shifting in the hand.

Oyabun™

The Japanese word "Oyabun" means "Boss," the undisputed leader, with authority over all his subordinates, including his "Kobun" or soldiers.

A larger and slightly thicker version of our Kobun,™ the Oyabun™ features a high, double-sided hollow ground bevel that's thin at the edge to facilitate razor sharpness.

The Oyabun™ handle has a deeply checkered Kraton® surface with an internal liner of Zytel. Relatively thin overall, the handle is deeply contoured in cross section to enhance grip strength and control.

Specifications: Kobun and Oyabun

The Trail Master® Series

Carbon V®

The Carbon V® Trail Master® is, without a doubt, the most knife for the money ever built. In terms of sharpness, edge holding, strength and sheer cutting power, it will outperform any factory made knife we know of and 99% of all hand forged knives as well.

Unlike our competitors, we can prove that the claims we have made for the Trail Master® are true. You can see the evidence for yourself in our video entitled PROOF.

Watch as the Trail Master® sets a new world record in cutting power by severing seven one inch ropes in a single stroke! See its virtually unbreakable blade flexed in a vise over 50° and supporting the weight of 4 men (832lbs) on its blade-handle juncture. Observe its incredible resistance to shock and abuse as its massive 5/16" thick blade back is repeatedly used to crush concrete blocks. It's tests like these that prove that the Trail Master® is simply the best Bowie knife in the world.

Stag Trail Master®

The antlers of the Sanbar stag have been prized for centuries for use in knife handles due to their great beauty and durability. All of these knives share the same design and performance features found in the blade of the Carbon V® Trail Master®. The only change is that we modified the blade tang to accept the stag round and added a beautiful hand polished brass pommel.

Stainless Steel Stainless Trail Master® (AUS 8A or San Mai III®)

If you want a Bowie knife that requires minimum maintenance and is practically immune to water, salt, air, or the humidity of a jungle environment, the Stainless Trail Master® is for you!

Made from AUS 6A Stainless or San Mai III,® these knives will outperform any other stainless steel Bowie in the world in terms of strength and toughness. As an added bonus, each Stainless Trail Master® comes with a beautiful rolled edge, capable of easily severing 4" or more of free hanging manila rope!

Master Hunter

The Master Hunter's thick, broad blade has been flat ground extra thin with a distinct distal taper for unprecedented cutting ability, edge retention and ease of re-sharpening. The comfortable, deeply checkered Kraton® grip encourages long use without fatigue. This is the new standard for an American-made hunting knife. The Master Hunter has been extensively field tested in Africa, Australia, Alaska and Colorado. It has won the praise of some of the world's finest hunters including Ross Seyfried of *Guns and Ammo* Magazine. Available with a Carbon V® or AUS 8A Stainless steel blade.

Specifications:

	#36C Carbon V®	#36JS AUS 8A
Blade:	4 1/2"	4 1/2"
Overall:	9 3/4"	9 3/4"
Thick:	3/16"	3/16"
Weight:	6.4oz	6.4oz
Sheath:	Concealex	Cordura

Filet Knives

Make short work of filleting fish with our Cold Steel Filet Knives! Nothing makes this task easier than a keen blade that will lie flat against the backbone and glide through a fish like butter.

Honed from 3/32" thick Carbon V® steel, our Filet blades are stronger and tougher than the competition's and they hold their sharp edges longer than any stainless blade.

The key to the Filet Knife's cutting power is an approximately 20% wider blade than most of our competitors. This allows a for a long, shallow "V" cross section, a wider grind, and a thinner edge which makes for a sharper knife.

Available in 3 blade lengths, the Filet Knives feature deeply checkered, shock absorbing Kraton® handles for a firm grip. The hard, self-draining polycarbonate sheaths sport an integral belt loop.

Specifications: Filet Knives

3/32" thick Carbon V® Steel w/ Kraton® handles. Polycarbonate sheath.

Bird & Trout Knife

The Bird & Trout Knife is a modern version of a 100 year old classic, treasured by hunters and fishermen for generations. The secret to its enduring popularity is its ultra slim profile, and unique all steel construction.

The skeletonized handle offers great versatility and freedom of movement. It's perfect for working in tight places or making precise cuts. The ring allows the knife to hang from the little finger when not in use and yet remain instantly available.

The Bird & Trout is made out of Carbon V® steel with a hard epoxy powder coat to minimize rust. For safety and handiness, each knife comes with a stout, yet light weight Kydex® neck sheath and paracord lanyard.

Specifications: Bird & Trout

Thick:	1/10"	Weight:	1 oz.

Includes Concealex™ neck sheath.

Peace Keepers™

Are you tired of looking at those expensive, double edged knives that are so dull out of the box that they won't cut butter? Or that well known American model that's so brittle it can break if dropped in the sink? Well there *is* an alternative. The Peace Keepers — Cold Steel's® double edged knives that perform like nothing you've seen before.

Unlike most boot knives and daggers, the Peace Keeper's spear point offers considerable resistance to bending or breaking.

Available in Carbon V® for maximum strength or AUS 8A stainless steel for lower maintenance, and treated with Cold Steel's® custom heat treatment, the Peace Keepers offer the utmost in strength, toughness, and superior edge retention.

Specifications: The Peace Keeper™ Series

Kraton® handles. Carbon V® versions come with a black epoxy powder coat finish.

Bush Ranger™

The Bush Ranger™ fulfills a need for a light sheath knife that's large enough to be useful, yet small enough to wear on a belt every day. The flat ground blades curve continuously, allowing the blade to be used in a highly efficient draw cut as well as a chopping stroke.

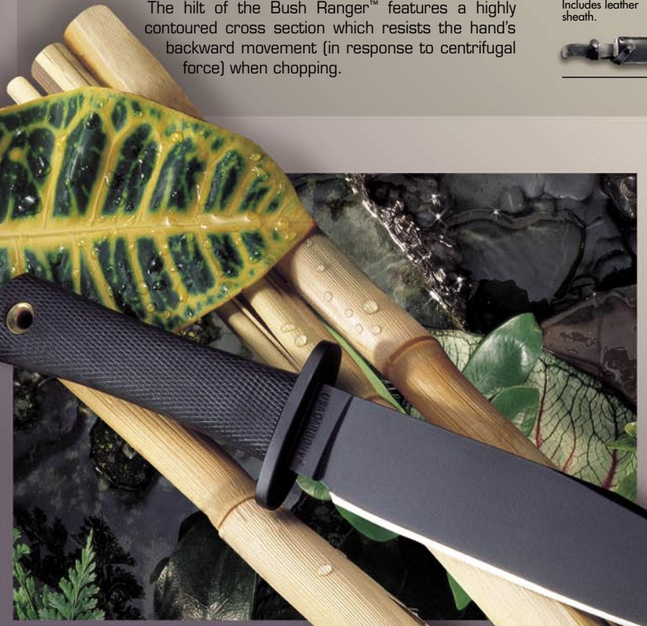
Unlike most clip point knives made today, the Bush Ranger™ features a Sheffield point with an extra long false edge. The advantage of this point is that it is sharply acute for close, delicate work, yet sturdy enough to resist bending or breaking.

The hilt of the Bush Ranger™ features a highly contoured cross section which resists the hand's backward movement (in response to centrifugal force) when chopping.

Specifications: Bush Ranger™ Series

	#37CF Carbon V®	#37JS AUS 8A
Blade:	7 1/2"	7 1/2"
Handle:	5"	5"
Overall:	12 1/2"	12 1/2"
Thick:	3/16"	3/16"
Weight:	8.8oz.	8.8oz.

Kraton® handles. Carbon V® version comes with a black epoxy powder coat finish. Includes leather sheath.



Recon Scout

In most respects the Recon Scout® is simply a 7 1/2 Trail Master. It has the same steel, heat treatment, blade thickness, and blade shape. Only the satin polish has been changed, in favor of a rich, baked-on black epoxy finish. This helps to control rust, minimize light reflection and deliver years of rugged service. The blade is flat ground from top to bottom for maximum shearing power and the razor sharp edge is continuously curved along its entire length. This curve allows the blade to be used in a variety of cutting and chopping strokes. Plus, the extra curve near the tip provides plenty of "belly" for emergency field dressing.

We believe the Recon Scout is the finest combat knife in the world and also one of the best bargains in combat knife history.

Specifications: Recon Scout®

#37C	
Blade:	7 1/2"
Handle:	5"
Overall:	12 1/2"
Thick:	5/16"
Weight:	15 oz.

Kraton® handle. Comes with a black epoxy powder coat finish. Includes leather sheath.

Tactical Field Knives

SRK® (Survival Rescue Knife)

Survival/Rescue operations demand a versatile knife able to withstand extreme abuse. The SRK® was designed with this in mind. No expense was spared in steel, heat treatment, and construction. The blade has a rich black epoxy powder coat to help protect the Carbon V® steel from the elements. The 3/16" thick blade features a strong clip point that's hand honed to a superb edge that is hair flinging sharp.

The SRK®'s handle sports a single quillion finger guard and a deeply checkered grip.

Specifications: Tactical Field Knives

	#38C SRK	#13RT Recon Tanto

Recon Tanto

Our superb Japanese Tantos are still unsurpassed for fit and finish, but financially they are beyond the reach of many knife lovers. Now we've combined classic Tanto styling, the strength of Carbon V®, and a comfortable, western-style handle in a very affordable package. The Recon Tanto is redefining the standard for combat knives. It is fast becoming the preferred fixed blade for SWAT teams and special military units.

SRK Survial Rescue Knife

Recon Tanto

R1 Military Classic

Classic Reproductions

R1 Military Classic

This classic WWII design has seen action in every major conflict around the globe, including Korea, Vietnam, Central America and the Persian Gulf.

Our R1 Military Classic is an exact replica of the original and offers unbelievable performance for less than half of the original price. Each knife is made to the most exacting Cold Steel® standards and represents quality you can bet your life on!

Black Bear Classic

First developed by Bob Loveless, one of the founding members of the knifemaker's guild, the Black Bear Classic is perhaps the quintessential combat knife. Its 8" blade offers excellent reach, and the sub hilt practically eliminates the possibility of the hand being dislodged or coming into contact with the blade.

Black Bear Classic

Specifications: Classic Reproductions

AUS 8A Stainless steel with 300 Series Stainless guards. Black linen Micarta handles. Leather sheath with a Norton Fine India sharpening stone and pouch.

Utility Knives

Kitchen Series

In studying hundreds of different kitchen knives, we were amazed by the poor quality of the dull and often warped blades that we encountered. So we decided to make our own! The Kitchen Series is available in 5" and 7" lengths and both are the sharpest kitchen knives you have ever experienced!

The blades are 1 1/2" wide, flat ground and then honed to a superb serrated edge. Now your kitchen duties can be done with the ease of Cold Steel precision and performance.

Specifications:

AUS 8A Stainless Steel with Kraton® handles, and Black Polypropylene sleeves.

Para Edge™

Cold Steel's Para Edge™ neck knives are as light as a feather. They offer fixed blade performance in a pocket knife sized package. Weighing in at a mere 2 ounces including sheath and paracord lanyard, they can be comfortably worn 24 hours a day. Suspended from the neck outside of clothing, they make a handy utility or rescue knife.

Each Para Edge comes with a rugged, high performance AUS 6A stainless blade ground to a thin razor sharp edge and safely housed in a tough Concealex™ sheath.

Specifications:

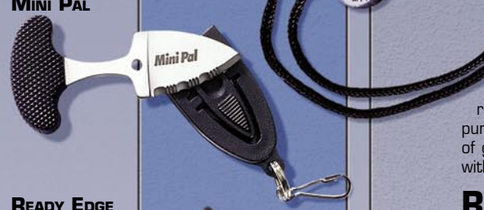
Para Edge™ Tanto Point

Mini Pal



Ready Edge

Mini Pal

The Mini Pal is only 1/2 an ounce in weight yet it delivers heavyweight performance. The edge zips through a host of materials at unbelievable speed. The 1" long blade is razor sharp, to open delicate packages and envelopes, cut rope or punch through heavy cartons. Plus the unique handle offers a variety of grips that would be impossible with any other design. It comes with a Zytel® lanyard sheath.

Ready Edge

With a grip similar to the Para Edge™, the Ready Edge sports a smaller 2" spear point blade. The blade is double hollow ground with our distinctive serrated edge. It comes with a convenient lanyard sheath. Scuba Divers are using it, and it's become a favorite among fishermen in Alaska for cutting nets and heavy line.

Specifications:
Mini Pal & Ready Edge

Weight:	0.5oz.	1.3oz.

400 Series Stainless Steel with Kraton® handles. Zytel® sheath with lanyard hook.

A Concealex™ neck sheath similar to the one that comes with the Para Edge is available for the Ready Edge(#SK42NS)

Twistmasters

Strong, lightweight and simple. All the performance you expect from a Carbon V® blade housed in a super tough Zytel® handle. These knives feature extra wide blades and thin edges for maximum shearing and cutting power. They will cut rope and other materials with ease, yet they aren't too unwieldy to slice tomatoes or apples if need be.

Simple construction and massive strength virtually eliminate the possibility of the typical mechanical problems that can occur in a traditional lockback.

Simply open the knife and twist the ring firmly to lock the blade in place.

Specifications: Twistmasters™

Carbon V® Steel with Zytel® handles.

A Nylon sheath is included.

The Cold Steel Kukri Series

The Greek Kopis and The Roman Machaira were both possible inspirations for the Kukri. These ancient, forward curved blades were known for their tremendous chopping cuts. Cold Steel takes great pride in being able to offer our versions of these historic blades.

LTC Kukri

The curve of our LTC Kukri's blade is very important because no matter what part of the blade makes contact with a target, the edge is always presented at an angle. This creates a shearing motion, so that the edge slices through the target as the weight of the blade drives it deeper.

Gurkha Kukri

The Gurkha Kukri will out-chop any factory or handmade knives, including swords twice its size — even expensive, hand forged Japanese Katanas.

Taking advantage of its downward curving blade and long, "V" shaped cross section, the Gurkha Kukri places its edge at an angle to a target, creating a powerful shearing effect.

The heaviest Kukri on the market, the blade is almost an inch wider near the tip than it is at the handle, which shifts the knife's balance point forward. This allows a substantial blow to be struck with minimal effort, using inertia alone to complete the cut.

Gurkha Light

For those who prefer a lighter Kukri, we offer our Gurkha Light. At 16 ounces and sporting a 1/8" thick saber ground blade, it is a lighter rendition of our Gurkha Kukri.

Specifications: Kukri Series

	#35LTC LTC Kukri	#35ATCB Gurkha Kukri	#35GLK Gurkha Light Kukri
Blade:	12"	12"	12"
Handle:	5"	5"	5"

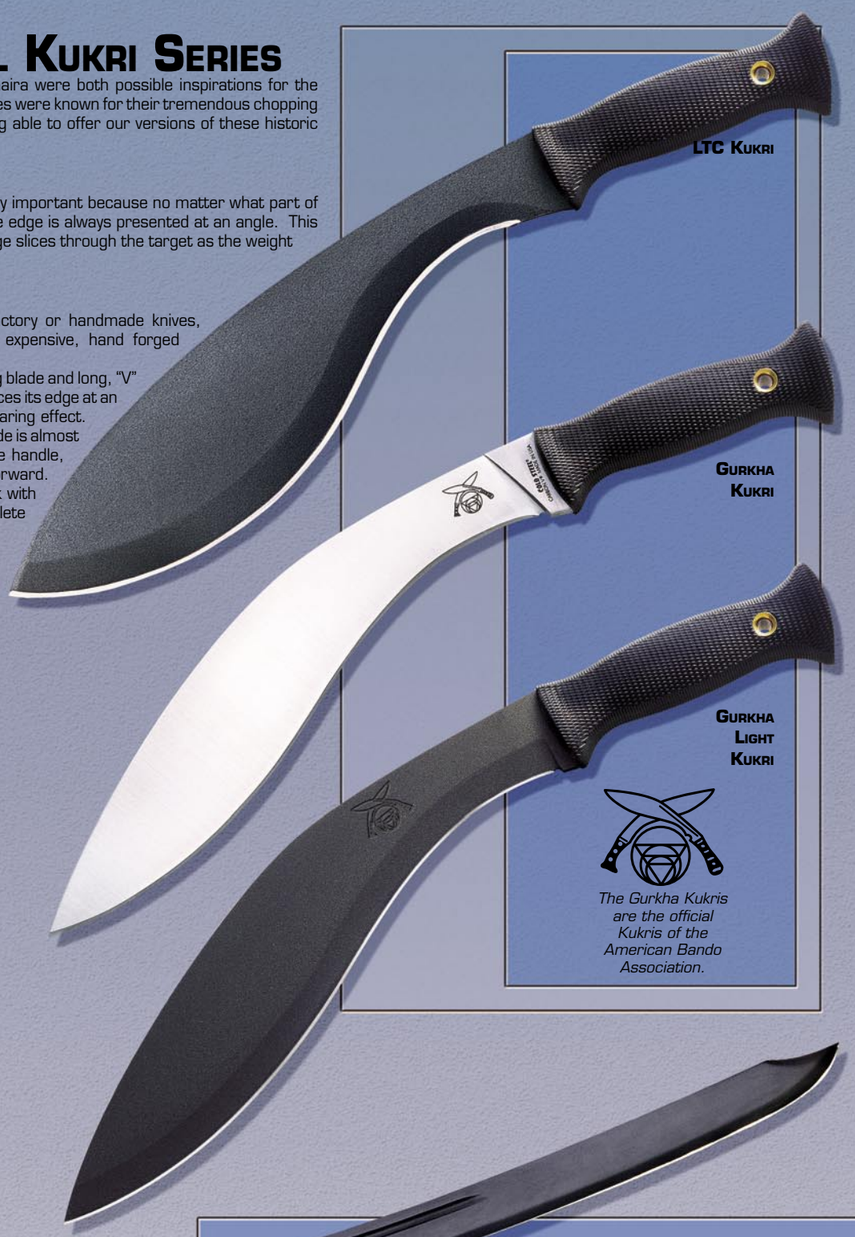
Carbon V® Steel with Kraton® handles. A leather sheath is included. The sheath features a hard plastic safety liner.



The Gurkha Kukris are the official Kukris of the American Bando Association.

1917 Cutlass

Cold Steel's® modern recreation of this classic fighting sword is as authentic as possible. The Cold Steel® 1917 Cutlass features the signature 1 1/4" wide curved blade with a short clipped point, sharp enough for good penetration yet sturdy enough to resist bending or breaking.

Just like the original, our cutlass features a half basket guard stamped out of heavy 18-gauge carbon steel and blued (to resist rust) to match the blade. The handle is fashioned from carefully shaped hardwood painted brown and secured to the full tang by three heavy brass cutler's rivets. The reproduction scabbard is made entirely of high quality leather, brass and copper.

Specifications:
#88CS

Blade:	24 3/4"
Handle:	4 5/8"

w/o Sheath:	33.7oz.

1050 Carbon Steel

Includes leather scabbard. (right)

Bad Axe

The Bad Axe is made of medium carbon steel, over 2mm thick and fully heat treated for strength. You'll find the Bad Axe is light enough to swing with one hand, and it's many points and edges make it ideal for target throwing competitions!

Special Forces Shovel

The Special Forces Shovel is modeled after the original Soviet Spetznaz shovel. The Spetznaz soldiers made up the most elite unit in the Soviet Army. The U.S. equivalent would be our Green Berets.

The shovel head and socket are forged from medium carbon steel, then heat treated for maximum strength. The edges come sharpened to a utility/axe edge that can easily be improved to razor sharpness.

Specifications:
Special Forces Shovel

Width:	6"	8 1/8"

Medium Carbon Steel with a hardwood handle.

Drop Forged Tomahawks

The Drop Forging Process

Our tomahawks are precision drop forged from medium carbon 5150 steel. During the forging process a metal ingot is heated almost white hot and then formed into shape in a series of progressive dies. During this forming process the steel is kneaded and compressed into a completely homogenous mass.

Like all good tomahawks, these are differentially heat treated. This means that the cutting edge and hammer face is fully hardened, while the balance of the head is left relatively soft to absorb the shock of striking blows.

Norse Hawk

Capturing the Viking spirit, the Norse Hawk's 4" blade features a highly curved cutting edge and terminates in two sharp points. These points increase the chance of a stick when the Norse Hawk is thrown.

Frontier Hawk

Conjuring up images from the American past, the Cold Steel Frontier Hawk is our lightest and smallest tomahawk. Its light weight makes it a highly functional camp hatchet, while causing minimal fatigue to wrist, elbow and shoulder.

The Rifleman's Hawk

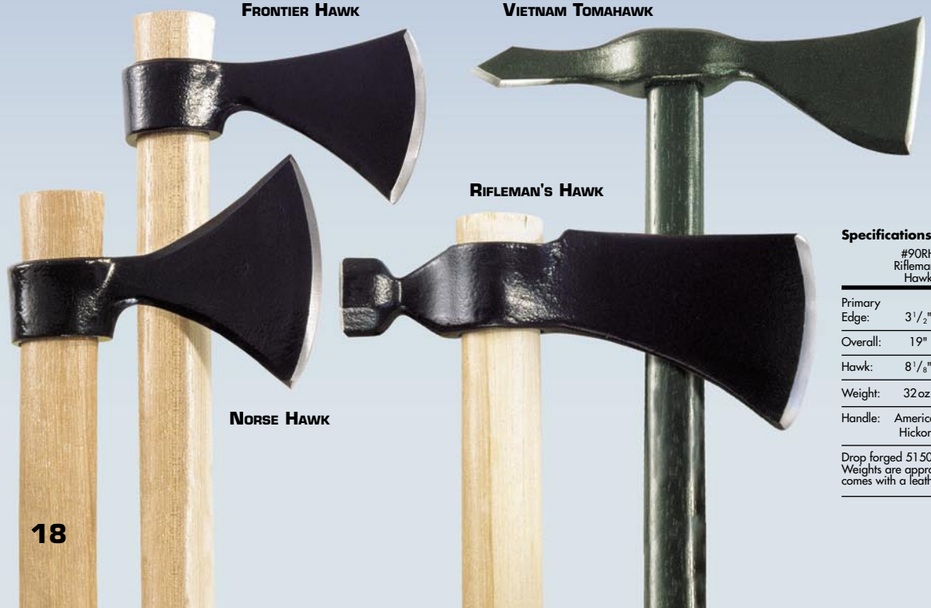
This superb tomahawk features a factory honed cutting edge. It has two sticking points on its cutting edge for throwing and throws extremely well.

The Rifleman's Hawk has a traditional American hammer-head style butt for hammering stakes.

Vietnam Tomahawk

Like the historical Vietnam Tomahawk, our exact replica is light enough to be carried all day without causing undue fatigue.

The blade of the "hawk" offers a wide, upswept primary edge for tremendous cutting and chopping potential. The secondary edge on the lower side of the head is specially curved and partially sharpened for both a cutting and hooking effect, and the "V" shaped spike on the back of the hawk head, make this an efficient implement for almost any situation.



The Vietnam Tomahawk Sheath.

Throwers

- **Mini Flight Thrower**
- **Sure Flight Thrower**
- **Pro Flight Thrower**

We know you'll love the reasonable prices and "professional style" of our Mini Flight, Sure Flight, and Pro Flight throwing knives. Why? Because these knives have all the features you're looking for in a top quality thrower. Each knife is perfectly balanced for throwing and will accommodate either a blade or handle oriented throwing style. What's more, due to their super tough Carbon V® construction and durable black epoxy coat finish, they'll stand up to literally thousands of throws. And, to make your job even easier, we have incorporated a strong, yet very sharp, Sure-Stick™ point into their design that guarantees a hard hit and superb penetration.

True Flight Thrower

Sure, there are a lot of throwing knives on the market but they all seem to be made out of cheap steel that bends or worse, stainless steel that breaks. That's why we made the True Flight Thrower.

Our True Flight Thrower beats the competition, hands down. We use our own Carbon V® Steel for a hard, yet resilient blade that will "bounce-back" from any throw. For versatility, we have given it a utility edge that will stand up to your toughest chores.

The Torpedo

Heavy and perfectly balanced, the Torpedoes are a lot of fun for target throwing. The double tapered points slide effortlessly from the hand for a perfect release with twice the sticking potential of a conventional throwing knife. The Torpedoes are made from cold rolled 5150 steel, zone heat treated for maximum resistance to breakage.

Lathi (Lah-Tee)

India is a society of over a billion people speaking hundreds of different dialects and worshipping through a multitude of religions.

Strife and civil disorder can flare up and often the only defense against anarchy is the Indian police, who rely on one main weapon in crowd control… A four foot long Lathi! Issued as standard equipment, the reason for the Lathi's popularity as a crowd control device is its versatility and non-lethal effectiveness.

At six feet, (A) the Lathi becomes an excellent hiking or camping staff. In fact it has sufficient length so that it can be cut to exactly fit the user. With the bark left on these sticks they are virtually impervious to the elements.

Four feet, (B) is the standard police length in India, a good practical sized Lathi.

Our Three Foot Training Stick (C), made out of the same tough rattan as our Police Lathi, is approximately three feet long and is three quarters to one inch in diameter.

Anyone who has difficulty in walking, maintaining their balance, traversing rough, hilly terrain, or suffers from back, knee, or hip pain will benefit from the **Crook Top Cane (D)**. It's stylish and sturdy and will provide support wherever you go.

Specifications: The Lathi Series

	#91TS 3 ft. Training Stick	#91CTC Crook Top Cane	#91PL4 4 ft. Lathi	#91PL6 6 ft. Lathi
Length:	36"	36"	48"	72"

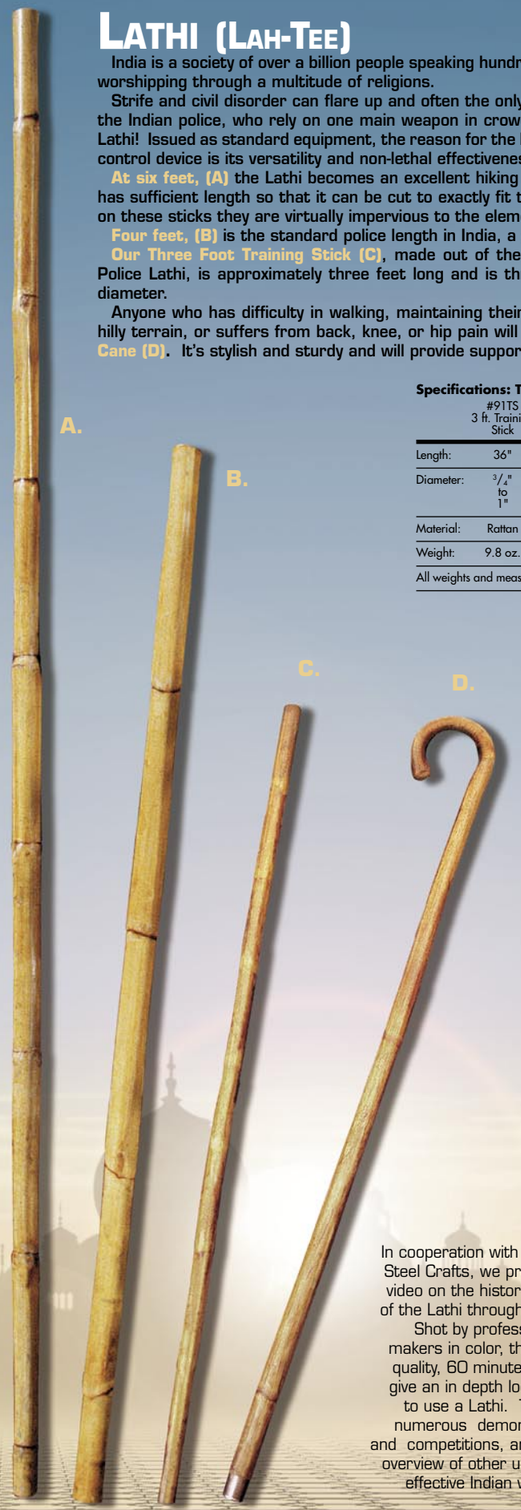
Material:	Rattan	Rattan	Rattan	Rattan
Weight:	9.8 oz.	11.1oz.	10.7 oz.	1lb. 5.6 oz

All weights and measures for sticks are approximations.

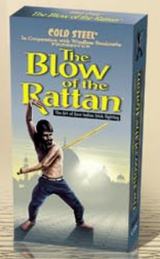


A word about rattan…

Despite its resemblance to bamboo, Rattan is not hollow. It is composed of thousands of tough, thin fibers that are densely packed together and encased in a smooth hard skin. This construction gives it enormous strength and substantial flexibility. Rattan sticks flex rather than break. So when they strike hard objects, they absorb shock rather than transfer it to the user. The bark is left on because it adds tremendous strength to the rattan. In fact, when combined with the fiber core, it is tough enough to offer good defense against even edged weapons. Our Lathis are made of select Rattan of the highest quality. They are picked for us by one of the major suppliers of Lathis to the Indian Government.

The Blow of the Rattan

In cooperation with Windlass Steel Crafts, we present our video on the history and use of the Lathi throughout India. Shot by professional film makers in color, this superb quality, 60 minute video will give an in depth look at how to use a Lathi. There are numerous demonstrations and competitions, and a good overview of other unique and effective Indian weaponry. {#VBOR}



Walkabout

The walking stick has earned its place in history. Every culture in human experience has utilized it in one form or another. To pay homage to this tradition and provide you with a quality tool, Cold Steel® presents the Walkabout.

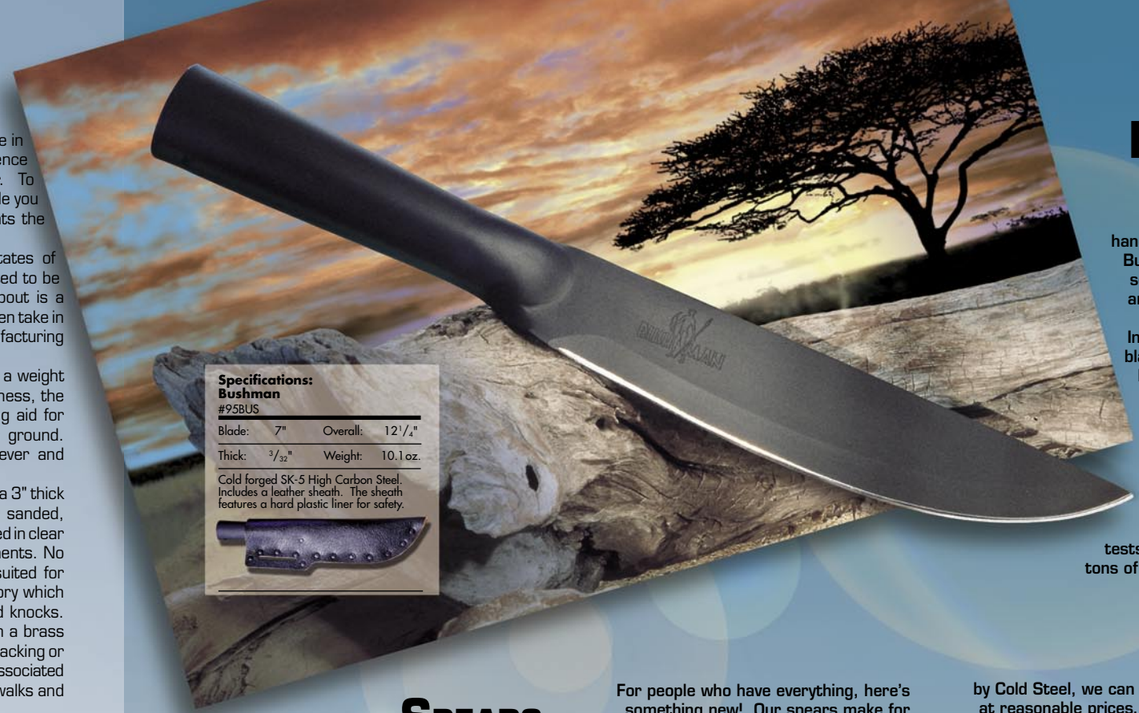
Fashioned entirely in the United States of second growth hickory specially selected to be free of all knots or flaws, the Walkabout is a prime example of the pride our craftsmen take in their work at our Hope, Arkansas, manufacturing facility.

With a length of approximately 37", a weight of 20-22 ounces, and a 2" knob thickness, the Walkabout provides a sturdy balancing aid for traversing rough, slippery or uneven ground. It also serves as a pointer, probe, lever and emergency defensive tool.

Each Walkabout is lathe turned from a 3" thick hickory blank which is then carefully sanded, "flamed" for visual appeal and then coated in clear polyurethane to protect it from the elements. No other American hardwood is better suited for this purpose than tough, durable hickory which stands up to continuous use and hard knocks. Every Walkabout comes complete with a brass ferrule which protects the stick from cracking or the excessive wear associated with concrete sidewalks and city streets.

Specifications:
#91WAC Walkabout Cane

Length:	38"
Diameter:	1 7/8" tapered to 1"
Material:	Hickory
Weight:	21oz.



The Bushman

An Economical Survival Knife!

Unlike most hollow handle survival knives, the Bushman™ has no joint or seam between the blade and handle that requires a mechanical fastener. Instead, the Bushman's™ blade and integral handle have been expertly cold forged out of a single piece of 2.5mm thick SK-5 high carbon steel. The resulting knife has been heat treated and tempered to RC54 and when subjected to factory tests, has withstood over 2 tons of pressure on its blade/handle transition!

Spears

For people who have everything, here's something new! Our spears make for a unique, and athletic target throwing experience!

Available in a variety of sizes, with Premium American Ash shafts, all Cold Steel spears are made from SK-5 Medium Carbon Steel . Using cold forging technology, pioneered by Cold Steel, we can offer high performance at reasonable prices. Like traditional spear heads, ours are heat treated and then drawn to a tough spring temper. The concept is that the spear head should flex or bend under impact stresses rather than break.

The Assegai (B), invented by the legendary Zulu king Shaka in the early 1800's, revolutionized tribal warfare in Southern Africa. Our version is available with your choice of two different shaft lengths.

The Javelin (C) is a superb throwing spear! With its light head, it sails through the air with minimal effort.

The Boar Spear (A), is a modern recreation of a design that dates back to the European Renaissance. It is cold forged out of medium carbon SK-5 Steel and, like our other spears, is heat treated to a spring temper. The Boar Spear comes with an extra stout premium ash shaft.

Specifications: Spears

SK-5 Steel with Premium Ash Shafts.

CAT Tanto

The CAT Tanto is a one hundred percent Zytel® reproduction of Cold Steel's® famous original Tanto! It shares all of the design features that made the original Tanto so popular, including the sure-grip handle shape and the reinforced point.

Made from 43% glass-filled Zytel® nylon which has been UV and heat stabilized to be impervious to the elements.

Specifications: CAT Tanto and Delta Dart

	#92CAT CAT Tanto	#92DD Delta Dart
Blade:	$5\frac{3}{4}$"	$3\frac{1}{2}$"
Overall:	$11\frac{1}{4}$"	$7\frac{7}{8}$"
Thick:	$\frac{11}{64}$"	$\frac{1}{2}$"
Weight:	3.2oz.	0.7oz.

All Zytel® construction.

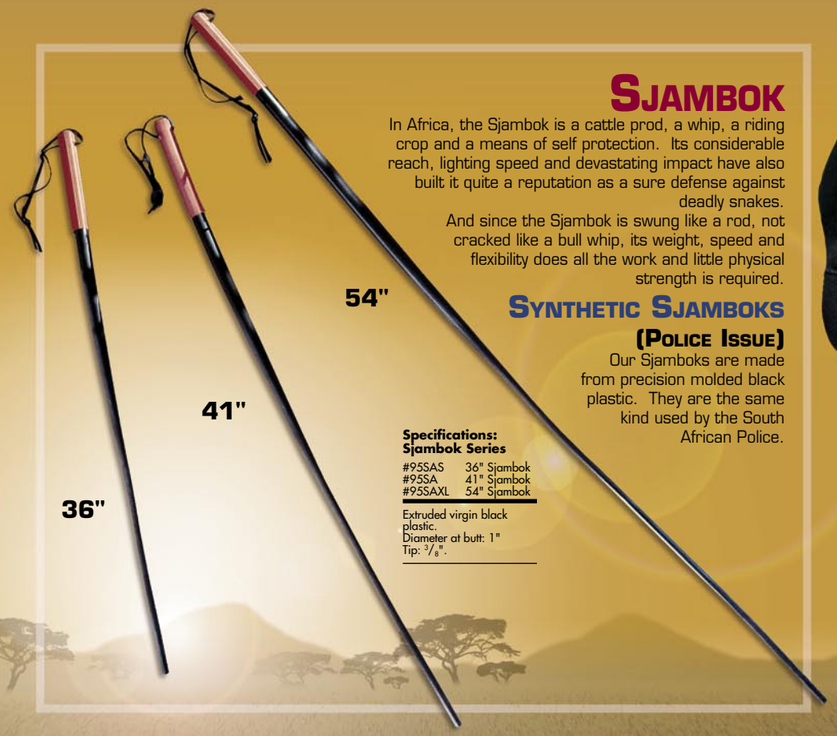
Delta Dart

The Delta Dart is 8 inches long and a half inch in diameter, yet it weighs only seven tenths of an ounce!

Like the CAT Tanto, the Delta Dart is made from extremely hard 43% glass-filled Zytel®. This is the highest glass to nylon ratio available so the point is tougher, lasts much longer and is easily re-sharpened with a nail file.

CAT Tanto

Delta Dart



Sjambok

In Africa, the Sjambok is a cattle prod, a whip, a riding crop and a means of self protection. Its considerable reach, lighting speed and devastating impact have also built it quite a reputation as a sure defense against deadly snakes.

And since the Sjambok is swung like a rod, not cracked like a bull whip, its weight, speed and flexibility does all the work and little physical strength is required.

Synthetic Sjamboks (Police Issue)

Our Sjamboks are made from precision molded black plastic. They are the same kind used by the South African Police.

Specifications: Sjambok Series

#95SAS	36" Sjambok
#95SA	41" Sjambok
#95SAXL	54" Sjambok

Extruded virgin black plastic.
Diameter at butt: 1"
Tip: $\frac{3}{8}$".

Cold Steel® Apparel

Cold Steel® Shirts

Show off to the world! You know who makes the best knives! We now have a variety of apparel items for almost any occasion.

"Swordsman" (A)

The Cold Steel® "Swordsman" 100% cotton Tee features a classic Samurai figure wielding our Hamidashi! The Kanji characters meaning "Master Bladesmith" are on the front and back of the shirt.
Sizes: M, L, XL, XXL.

Basic Black Tee (B)

Our jet-black tee comes has the distinctive Cold Steel® logo with the phrase "World's Strongest Sharpest Knives"™ as a sub-head. Like our Swordsman shirt, this Tee is 100% pre-shrunk, extra heavy cotton.
Sizes: L, XL, XXL.

Polo Shirts (C)

Want to look more upscale? Cold Steel® now has Polo-Styled shirts. These shirts are available in white or navy blue and come with our distinctive logo embroidered on the left side of the chest. As an added feature, we have included an embroidered image of our Tanto just above the cuff of the left sleeve. 100% cotton pique, clean finished three-button placket, welt collar and cuffs with woodtone buttons. **Sizes:** M, L, XL, XXL.
