SHAVING IS A QUICK INDICATOR OF SHARPNESS. MOST FACTORY AND CUSTOM KNIVES DO NOT EXHIBIT THIS SHARPNESS WHEN FIRST USED. ALL COLD STEEL® KNIVES ARE SHAVING SHARP, RIGHT OUT OF THE BOX!

CRITICS SAY THAT PRACTICALLY ANY KNIFE CAN BE STABBED THROUGH A CAR DOOR... BUT, UNLIKE OTHER KNIVES, OUR GUNSITE™ FOLDER'S REINFORCED TANTO POINT IS REMARKABLY UNAFFECTED BY THE ORDEAL.

THE TRAIL MASTER FLEXED IN A VISE WITH THE HELP OF A THREE FOOT PIPE FOR LEVERAGE. MOST COMPETITOR'S KNIVES SHATTER WELL BEFORE THEY REACH THIS POINT.

COLD STEEL FOLDING KNIVES HAVE BEEN TESTED (AND PROVEN) TO WITHSTAND MORE WEIGHT PRESSURE ON THEIR LOCKS THAN 99% OF OUR COMPETITOR'S LIKE MODELS.

RETAINING AN EDGE WHILE REPEATEDLY CUTTING PINE WOOD INDICATES SUPERIOR FINE EDGE RETENTION. WE MAXIMIZE THIS POTENTIAL IN OUR KNIVES.

TESTING

WE ARE VITALLY INTERESTED IN ALL THE ELEMENTS THAT ARE CRITICAL TO OVERALL PERFORMANCE.

TO BACK UP OUR CLAIMS, WE SUBJECT OUR KNIVES TO THE MOST STRENUOUS SERIES OF TESTS IMAGINABLE AND RECORD IT ALL ON VIDEO TAPE.

COLD STEEL'S® DOCUMENTARY VIDEO, **PROOF** SHATTERS THE CLAIMS OF OUR COMPETITORS.

#VC90
PROOF Video

MOST OF THE TESTS SHOWN ON THESE PAGES AND IN OUR **PROOF** VIDEO ARE DANGEROUS AND SHOULD NOT BE DUPLICATED. ANY KNIFE CAN BE BROKEN OR DAMAGED IF SUBJECTED TO SUFFICIENT ABUSE. ALL KNIVES EVENTUALLY WEAR OUT AND MUST BE REPLACED.

THESE DESTRUCTIVE TESTS CONSTITUTE GROSS ABUSE OF A KNIFE. DUPLICATING THEM WILL VOID YOUR WARRANTY.

STEEL & HEAT TREATMENT

CARBON V®

Some of our Cold Steel knives are made from Carbon V®, a high carbon, low alloy cutlery grade steel. This steel is superior in performance to most other steels due to its chemistry and also because of the close controls that we maintain at every stage of the manufacturing process. These controls begin at the steel mill where Cold Steel specifies the desired microstructure of the steel. Once smelted, each steel shipment is microscopically checked for structural quality, cleanliness and chemical content by an independent metallurgist not in the mill's employ. The blades are then blanked parallel to the rolling direction of the steel plate to optimize grain flow along the length of the blade. The final step is a precise heat treatment sequence that was developed by Cold Steel specifically for this custom steel. This heat treatment process is one of our most highly guarded trade secrets. It was arrived at over several years by using an exhaustive series of practical and metallurgical tests and observations.

AUS STAINLESS

The words "stainless steel" are misleading, because, in fact, all steel will stain or show discoloration if left in adverse conditions for a sufficient time. Steel is made "stainless" by adding Chromium and reducing its Carbon content during the smelting process. There is a serious performance trade-off with stainless steel. As the Chromium increases and the Carbon decreases, the steel becomes more "stainless". But, it also becomes more and more difficult to sharpen, and the edge-holding potential is seriously impaired. This is usually why most stainless knives are rarely razor-sharp and quickly lose what little edge they have.

In contrast, at Cold Steel® we use AUS 8A Stainless, a high carbon, low chromium steel that has proven itself to be the ultimate compromise between toughness and strength, edge holding and resistance to corrosion.

AUS 8A is a medium to high carbon stainless which is tougher than ATS-34, 440C, ATS-55, etc., but still holds a good edge. This means it is particularly well suited for heavier, longer blades that are subjected to a lot of stress while chopping and hacking.

Like our other stainless steels, AUS 10A is a high carbon variety. It is equal in strength and toughness to AUS 8A but has the extraordinary advantage of an additional 20% in edge holding ability. This gives it a wide performance advantage over other steels like ATS-34, ATS-55 and 440V. The only knives Cold Steel® is currently manufacturing in AUS 10A Stainless steel are the Triple Action™ Folding Knives.

SAN MAI III®

San Mai means "three layers". It is the term given to the traditional laminated blades used by the Japanese for swords and daggers. Laminated construction is important because it allows different grades of steel to be combined in a single blade. A simple way to think of this type of construction is to imagine a sandwich: The meat center is hard, high carbon steel and the pieces of bread on either side are the lower-carbon, tough side panels. The edge of the blade should be hard to maximize edge holding ability, but if the entire blade was hard it could be damaged during the rigors of battle. For ultimate toughness the body of the blade must be able to withstand impact and lateral stresses. Toughness is generally associated with "softness" and "flexibility" in steel, so that, surprisingly, if a blade is made "tough" the edge will not be hard enough to offer superior edge holding. San Mai III® provides a superior blade with hard (higher carbon) steel in the middle for a keen, long lasting edge and tougher (lower-carbon) steel along the sides for flexibility. This laminate is 25% stronger than the incredibly tough AUS 8A Stainless.

5150

5150 is a medium carbon, low alloy steel that is particularly well suited to the hot forging process. This steel has the properties to harden well, making it ideal for heat treating blades that have a very thick cross section such as tomahawks, axes, etc. After the quenching process, blades will be completely hardened at Rc 55-60. The combination of carbon and alloying elements also produces an extremely tough and impact resistant steel in the hardened and tempered condition which is essential in a tool which is hafted and or thrown.

WARRANTY

WE STAND BEHIND OUR KNIVES ONE HUNDRED PERCENT. WE SUBJECT THEM TO THE HIGHEST STANDARDS IN THE INDUSTRY AND STRIVE TO MAKE EACH ONE AS PERFECT AS POSSIBLE. OUR FIXED BLADE SHEATH KNIVES HAVE A FIVE YEAR WARRANTY TO THE ORIGINAL OWNER AGAINST DEFECTS IN MATERIALS OR WORKMANSHIP. OUR FOLDING KNIVES ARE WARRANTED FOR ONE YEAR.

VOYAGER SERIES

Due to their light weight and convenience, Zytel® handled lockbacks have gained enormous popularity over heavier, traditional lockbacks with their metal bolsters and wooden scale handles. Our Voyager® Series is the latest generation of these ultra-light knives and they are sure to be the standard by which others are judged for years to come!

The newly redesigned Voyagers® are made from the same premium stainless steel that goes into our famous Tanto. They feature precision milled and hand fitted parts with extra stiff springs. This provides a lock that is safer and stronger than most traditional folders. The blades are extremely wide and ground thin at the edge for tremendous shearing potential. This thin edge allows us to hone the blade to astounding sharpness. Plus, the cutting surface is continuously curved along its entire length for the most efficient possible slicing action. Because of the high carbon content in the stainless steel, you'll find that the sharpness really lasts a surprisingly long time.

If you like serrations, you'll really appreciate our exclusive pattern. It offers the aggressive ripping action of serrated teeth, but with a twist. Our design features groups of very small teeth separated by wide, shallow arcs. This results in the benefits of both a plain and a serrated edge, so that the knife still cuts smoothly through almost any material.

The Voyager® Series offers all the advantages of the latest in lockback construction technology including lightning-quick one-handed opening, light weight and strength, yet without the necessity for unsightly humps or holes in the blade. The result is an appealing look with very modern styling. Every detail has been designed for maximum performance from the reinforced pivot pin and stainless steel pocket clip, to the grooved thumb shelf on the back of the knife for extra traction. Each handle in the newly redesigned Voyager® Series is now more oval shaped in cross-section. Technically, the handle is a full 20 percent thicker, increasing strength and stiffness. Yet, the handle doesn't feel or appear thicker due to the improved contoured design.

As tools, these lightweight, super sharp knives are appropriate in almost any environment from hunting and camping, to hiking and general utility chores. They can also readily fill specialty functions such as a boat or river knife, a chute knife or demanding police/survival/rescue applications.

NEW STAINLESS METAL CLIP

The new metal clip has been designed to keep your Voyager neatly and securely at hand at all times.

PLAIN, SERRATED, OR 50/50 EDGE STYLES

With the exception of the Tuff-Lite's, all of our Voyagers are now available in three different edge styles.

Now, for the first time, you can have your Voyager in a model, size, and edge style that best suits your needs.

IMPROVED ERGONOMICS...

Improved double thumb stud positioning for easy one handed opening with right or left hand.

New, deeper, more aggressive checkering pattern on both sides of the handle for a tighter, more secure grip.

TUFF-LITE™

Tough enough to do the job and light enough to be handy, the Cold Steel® Tuff-Lite's™ are there when you need them. They come complete with a lanyard hook so they easily attach to any keychain, belt loop, zipper pull, or neck lanyard.

Quality counts, even in small packages, so we made the Tuff Lite™ Voyagers® with reinforced pivot pins and lockwork that is capable of holding more than 40 pounds! The Zytel® handled Tough Lites are flat and light enough to be carried all day without effort, even in the pockets of tropical weight pants.

Cold Steel® is right on target with the Gunsite™ Folders — the first authorized and official knives of the Gunsite™ Training Center.

The state-of-the-art rocker lock, perfected by Cold Steel®, is the strongest mechanism of its kind, with extra stiff springs. The Tanto style blades are substantially wider than any competitor's, and are ground thin and honed to razor sharpness. The result is superb control, shearing power and penetration.

The newly redesigned Zytel® handle features a deeply checkered, oval cross section and has been made 20% thicker so it's even stronger and stiffer.

Nothing compares to the fit and finish of the Gunsite™ Folders, with precision parts milled and hand fitted to virtually custom quality. Like our Voyagers, the Gunsite™ folders come with a stainless steel pocket clip for easy carry.

Weight:	3.5oz.	1.6oz.

AUS 8A Stainless Blades with
Zytel handles.
The Land & Sea/Rescue knife
comes with a stainless steel
pocket clip.

When someone's life is in danger, there is often not enough time to fumble around trying to open a Swiss Army® or "tool" type knife and then saw frantically in a desperate bid to free them. You see, those types of knives have blades that are just too short, narrow and dull to immediately sever thick, tough, or fibrous material like rope, belts, straps, cables or webbing.

That's why Cold Steel® designed the Land & Sea Rescue™ Knife and the ER1. The unique "sheep's foot" style blades are the ideal blade style for rescue situations because they are less likely to injure accident victims when cutting away seat belts or clothing. Both feature AUS 8A Stainless blades for easy maintenance, and tough, Zytel® handles.

LAND & SEA/RESCUE™

When seconds count, the Land & Sea/Rescue™ Knife is more than equal to the challenge. In an emergency, it can be opened in the blink of an eye.

The Land & Sea/Rescue™ Knife sports a small, but powerful steel pocket clip, to keep the blade within easy reach. The innovative rocker lock, allows worry-free employment when a life is on the line. Once locked open, the blade can cut with the fury of a chainsaw with its wide, flat ground surface and serrated edge.

Its Zytel® handle is contoured and deeply checkered for a solid grip.

ER¹

The ER1 features a patented sliding lock mechanism that offers an easily accessible blade in a very safe package. When closed, the razor-sharp blade is locked securely inside a tough Zytel® housing.

To open, simply slide the button forward until it snaps into place. Once in the open position, the ER1 has been laboratory certified to withstand at least 50 lbs. of pressure on its point without collapsing.

Our distinctive Nogales™ Clip Point blades are ideal for shearing through thick, fibrous materials like manila rope, cable, hose, and belts. They feature double thumb studs for ambidextrous, lightning fast opening, and jimping on the blade spine to provide the thumb with extra purchase and control. Plus, they have lightweight Zytel® handles with stainless clips, making it easy to keep your Nogales™ folder nearby at all times.

NOGALES FOLDERS

Fashioned from AUS 8A Stainless steel (which out-performs ATS-34), these blades are precision flat ground to form a long shallow "V" cross section. The edges form a sinuous double curve. This means that whatever material is struck with the inward curving portion of the edge (nearest the hand) will automatically force the remaining outward curved edge entirely through.

The Nogales™ Series folders are available in a range of sizes from the compact, versatile El Lobo™ to the awesome cutting power of the Vaquero® Grande.

The Triple Action includes a steel pocket clip.

AUS 10A STAINLESS

Cold Steel's commitment to producing the finest cutlery in the world starts with procuring the finest materials. Five years ago we discovered AUS 10A, a high carbon stainless made in Japan.

We tested AUS 10A, along with every other Japanese-made stainless suitable for knife-making. Some steels showed promise, but weaknesses became apparent when we flexed them in a vise and began cutting rope.

The only equal to our AUS 8A in strength and toughness was AUS 10A; however, the big breakthrough was that it exceeded AUS 8A by an honest 20% in edge holding ability, giving it a wide performance advantage over ATS-34, ATS-55 and 440V.

The pistol grip shape of the Scimitar™ is one of the most versatile and user-friendly ever devised.

The Scimitar™ comes with a Steel pocket clip.

Sharp as Saladin's legendary blade, the sleek, classically curved Cold Steel® Scimitar™ places the power of the sword in your pocket. Our craftsmen have captured the timeless quality of superior cutlery and united it with the finest in modern materials. The result is a dazzling, high impact folding linerlock® like no other knife available.

SCIMITAR

The Scimitar™ blade is hollow ground from super tough AUS 8A Stainless Steel honed to razor sharpness and features the famous curve of its ancient namesake. It has been painstakingly designed to facilitate the most effective cutting stroke known to man, the draw cut. The blade also has a needle sharp point which pierces at the slightest touch.

Superior engineering combines traditional appeal with the latest Western technology in the contoured Zytel® and steel frame handle designed exclusively by Lynn Thompson for the Cold Steel® Scimitar.™ The pistol grip handle allows a forward, reverse or palm reinforced grip while finger grooves, checkering, a pocket clip and hard-hitting pommel contribute to its ease of carry and rock steady grip.

OYABUN

The Japanese word "Oyabun" means "Boss," the undisputed leader, with authority over all his subordinates, including his "Kobun" or soldiers.

A larger and slightly thicker version of our Kobun™ (see page 13), the Oyabun™ blade features a high, double-sided hollow ground bevel that's thin at the edge to facilitate razor sharpness.

The Oyabun™ handle has a deeply checkered Kraton® surface with an internal liner of Zytel®. Relatively thin overall, the handle is deeply contoured in cross section to enhance grip strength and control.

Specifications: Oyabun

Thick:	3/16"	3/16"
Weight:	10.8oz.	9.4oz.
Steel:	AUS 8A Stainless	San Mai Damascus
Handle:	Kraton®	Cord Wrapped Samé (Ray Skin)

300 Series Stainless guards, bolsters, and pommels. (The Imperial Tai Pan features mirror polishing on these areas.) Each includes a high quality leather sheath.

Each Imperial Tai Pan® is serial numbered 001-500 and comes with a signed certificate of authenticity.

The Tai Pan™ embodies all the best features of a classic dagger while minimizing its shortcomings. Most daggers are notorious for thin, easily broken points. In contrast, the Tai Pan™ features a sturdy spear point which is wide and thick enough to resist breaking.

As with the Tanto, the Tai Pan™ has a tapered, black Kraton® handle with a unique flattened oval cross section. Over time, this material and handle shape have proven ideal at preventing the knife from shifting or turning in the hand even under the worst circumstances.

TAI PAN

Our Imperial version of the Tai Pan™ shares many of the attributes of our regular version, yet differs markedly in its aesthetic styling. In the traditional Japanese way, the Imperial Tai Pan™ features a braided, cord wrapped handle in the centuries-old "cross over" pattern, with a unique underlying base of "Samé" or ray skin.

The razor sharp blade is 161-layer San Mai Damascus steel. This rare steel consists of two 80 layer sections laminated around a hard stainless core. The end result is a visually breathtaking and virtually unbreakable blade.

Exhibiting an unequalled level of craftsmanship, the knives in the Tanto Series feature a lustrous satin finish on the hollow ground blade bevels and a line grain finish on the flat spine. These two finishes characterize our state of the art grinding technique and accentuate the Tanto's unique appearance.

TANTO

Mini Tanto: Complete with all stainless steel fittings, including a traditional oval guard (tsuba), the Mini Tanto is scaled down to the smallest practical size. The result; a perfect boot/belt knife. Minimal weight and size combine with maximum sharpness, cutting power and point strength to outperform much larger knives.

Tanto: The knife that started the Cold Steel® legend. It features a beautiful stainless steel guard and pommel and a virtually indestructible 6" blade.

Master Tanto: Comparable to the original, except that its blade is San Mai III,® making it approximately 25% stronger.

Magnum Tanto II: Just two ounces heavier than the Tanto, the Magnum Tanto II provides a full 30% increase in cutting power. Combine that with the visual impact of a tsuba-style [sword] guard and you have perhaps the ideal Tanto. The Magnum Tanto II features a blade made from San Mai III.®

Magnum Tanto IX and XII: These knives were created in response to popular demand for a longer Tanto. They are available with 9" or 12" blade lengths, and both feature our exclusive San Mai III® laminated steel.

CULLODEN™

Named after the last heroic battle of the Scottish nation on April 16, 1746, the Culloden™ and the brand new Mini Culloden™ are alternatives to the traditional double edged boot knife. Available with either a plain or serrated edge, the Culloden™ conjures memories of the kilt-clad highland warriors of old.

The super tough Kraton handle is checkered for unsurpassed grip comfort, while the 5-inch or 3 1/2-inch AUS 8A Stainless steel blade offers superior edge holding ability. The Culloden™ is a lean, efficient implement, well worthy of its commemorative namesake.

SAFE KEEPERS™

The push knife was first made popular in the U.S. during the 1849 Gold Rush in California. The reason for the phenomenal success of this knife was a combination of its compact size and unparallelled grip.

Now Cold Steel® is happy to present the finest production push knives in almost 150 years.

Designed for the 21st century, these knives are becoming popular with military personnel around the world because, unlike a revolver or automatic pistol, they never break, malfunction, or run out of ammunition. What's more, they offer "big knife" capabilities in a compact package (2" shorter overall than most boot knives) that can be easily attached to tactical web gear, tucked in a waistband or boot top, or strapped to a wrist or ankle.

Specifications: Safe Keeper™ Series

BOOT KNIVES

DESPERADO™

The Desperado... an outlaw, with nothing left to lose, and an astonishing reputation to be gained. With some formidable skills with a gun and a knife, he became one fierce opponent, worthy of respect and often, widely feared.

Cold Steel offers a knife which lives up to that reputation with our versatile Desperado!™

The Desperado™ features a serrated, 5" Nogales™ clip point blade and an innovative egg-shaped Kraton® handle. It combines the performance sensibilities of a push dagger with the versatility of a conventional boot knife.

Special attention was paid to the knife point. Designed to be sharp, yet thick enough to withstand hard impact and even light prying, the Desperado's™ point has strong advantages over other blades that have less pronounced curves.

Specifications: Desperado™ #49DS

Blade:	5"	Overall:	8 3/4"
Thick:	3/32"	Weight:	4.8oz.

AUS 8A Stainless. Kraton® grip. Quick draw Concealex™ sheath with a boot/belt clip.

KOBUN™

Available in both AUS 8A Stainless or black epoxy powder coated Carbon V® steel, the Kobun™ blade won't let you down like other boot knives which are notorious for paper thin, easily bent or broken points. The full thickness of the blade's spine runs almost to its very tip for added strength. The handle, with its thin cross section and contours, is designed to offer minimum bulk and maximum grip. It is deeply checkered to resist turning or shifting in the hand. The rugged Concealex sheath is complete with boot/belt clip.

Carbon V® Kobun

AUS 8A Stainless Kobun™ (Plain)

AUS 8A Stainless Kobun™ (Serrated)

The Greek Kopis and The Roman Machaira were both possible inspirations for the Kukri. These ancient, forward curved blades were known for their tremendous chopping cuts. Cold Steel takes great pride in being able to offer our versions of these historic blades.

KUKRI SERIES

MINI GURKHA LIGHT

Perhaps the most versatile of our Kukri Series, the Mini Gurkha Light is an incredible combination of strength and utility. Its distinctively curved blade of Carbon V® steel gives it the chopping power of its larger siblings, but at only 13.9 ounces it's a pleasure to carry.

The Mini Gurkha Light's Kraton® handle can be cradled in the palm for maximum control in dispensing camp chores or hacking your way through thick brush. The blade is black epoxy powder coated and fits snugly into its black leather sheath.

GURKHA KUKRI

The Gurkha Kukri will out-chop any factory or handmade knives, including swords twice its size — even expensive, hand forged Japanese Katanas.

Taking advantage of its downward curving blade and long, “V” shaped cross section, the Gurkha Kukri places its edge at an angle to a target, creating a powerful shearing effect.

The heaviest Kukri on the market, the blade is almost an inch wider near the tip than it is at the handle, which shifts the knife's balance point forward. This makes it possible for a substantial blow to be struck with minimal effort, using inertia alone to complete the cut.

GURKHA LIGHT

For those who prefer a lighter Kukri, we offer our Gurkha Light. At 16 ounces and sporting a 1/8" thick saber ground blade, it is a lighter rendition of our Gurkha Kukri.

LTC KUKRI

The curve of our LTC Kukri's blade is very important because no matter what part of the blade makes contact with a target, the edge is always presented at an angle. This creates a shearing motion, so that the edge slices through the target as the weight of the blade drives it deeper.

TACTICAL FIELD KNIVES

PEACE KEEPERS™

Are you tired of looking at those expensive, double edged knives that are so dull out of the box that they won't cut butter? Or that well known American model that's so brittle it can break if dropped in the sink? Well there is an alternative. The Peace Keepers™ — Cold Steel's® double edged knives that perform like nothing you've seen before.

Unlike most boot knives and daggers, the Peace Keeper's™ spear point offers considerable resistance to bending or breaking.

Our Carbon V® Peace Keepers™ offer the utmost in strength, toughness, and superior edge retention.

BUSH RANGER™

The Bush Ranger™ fulfills a need for a rugged, light sheath knife that is large enough to be useful, yet small enough to wear on a belt every day. The flat ground blade curves continuously, allowing the it to be used in a highly efficient draw cut as well as a chopping stroke.

Unlike most clip point knives made today, the Bush Ranger™ features a Sheffield point with an extra long false edge. The advantage of this point is that it is sharply acute for close, delicate work, yet sturdy enough to resist bending or breaking.

The hilt of the Bush Ranger™ features a highly contoured cross section which resists the hand's backward movement (in response to centrifugal force) when chopping.

RECON SCOUT

In most respects the Recon Scout® is simply a 7 1/2" Trail Master. It has the same steel, heat treatment, blade thickness, and blade shape.

Only the satin polish has been changed, in favor of a rich, baked-on black epoxy finish. This helps to control rust, minimize light reflection and deliver years of rugged service. The blade is flat ground from top to bottom for maximum shearing power and the razor sharp edge is continuously curved along its entire length. This curve allows the blade to be used in a variety of cutting and chopping strokes. Plus, the extra curve near the tip provides plenty of "belly" for emergency field dressing. It is perhaps the finest combat knife in the world.

SRK® (SURVIVAL RESCUE KNIFE)

Survival/Rescue operations demand a versatile knife able to withstand extreme abuse. The SRK® was designed with this in mind. No expense was spared in steel, heat treatment, and construction. The blade has a rich black epoxy powder coat to help protect the Carbon V® steel from the elements. The 3/16" thick blade features a strong clip point that's hand honed to a superb, razor sharp edge that's hair flinging sharp.

The SRK's handle sports a single quillion finger guard and a deeply checkered grip.

RECON TANTO

Our superb Japanese Tantos are still unsurpassed for fit and finish, but financially they are beyond the reach of many knife lovers. Now we've combined classic Tanto styling, the strength of Carbon V®, and a comfortable, western-style handle in a very affordable package. The Recon Tanto is redefining the standard for combat knives. It is fast becoming the preferred fixed blade for SWAT teams and special military units.

R1 MILITARY CLASSIC

This classic WWII design has seen action in every major conflict around the globe, including Korea, Vietnam, Central America and the Persian Gulf.

Our R1 Military Classic is an exact replica of the original and offers unbelievable performance for less than half of the original price. Each knife is made to the most exacting Cold Steel® standards and represents quality you can bet your life on!

The R1 comes complete with a brown leather sheath, including a Norton Fine India stone and pouch.

BLACK BEAR CLASSIC

First developed by Bob Loveless, one of the founding members of the Knifemaker's Guild, the Black Bear Classic is perhaps the quintessential combat knife. Its 8" blade offers excellent reach, and the sub hilt practically eliminates the possibility of the hand being dislodged or coming into contact with the blade. The Black Bear Classic comes complete with a black leather sheath which includes a Norton Fine India stone and pouch.

KITCHEN SERIES

We studied hundreds of different kitchen knives and were amazed by the poor quality of dull, often warped blades. So, we set out to make the finest in kitchen cutlery. Available in both 5 and 7 inch lengths, Cold Steel's® kitchen knives are the sharpest of their kind in the world.

Flat ground and honed to a superb serrated edge, these AUS 8A blades are a joy to use. For even greater control, we've lengthened, slightly thickened, heavily contoured and deeply checkered the Kraton® handle with a more aggressive pattern. Now your kitchen duties can be done with the ease of Cold Steel® precision and performance.

MINI TAC™

Reliable and ready, Cold Steel's® new Mini Tac™ is setting the standard in neck knife performance.

The Mini Tac™ is light enough to be carried with ease, while placing awesome utility at your fingertips. Its 4-inch drop point tanto blade is fashioned of extra thin and wide AUS 6A Stainless Steel for maximum cutting power and control. The flat, thin Kraton® handle is deeply checkered and refuses to roll in your grip. The heavy duty Concealex™ neck sheath is injection molded and holds the knife securely while allowing for a lightning draw.

PARA EDGE™

Cold Steel's® Para Edge™ neck knives are as light as a feather. They offer fixed blade performance in a pocket knife sized package. Weighing in at a mere 2 ounces including sheath and paracord lanyard, they can be comfortably worn 24 hours a day. Suspended from the neck outside of clothing, they make a handy utility or rescue knife.

Each Para Edge™ comes with a rugged, high performance AUS 6A Stainless blade ground to a thin, razor sharp edge and safely housed in a tough Concealex™ sheath.

A Concealex™ neck sheath similar to the one that comes with the Para Edge is available for the Ready Edge (#5K42NS). Sold Separately.

MINI PAL

The Mini Pal is only 1/2 an ounce in weight yet it delivers heavyweight performance. The edge zips through a host of materials at unbelievable speed. The 1" long blade is razor sharp, to open delicate packages and envelopes, cut rope or punch through heavy cartons. Plus the unique handle offers a variety of grips that would be impossible with any other design. It comes with a Zytel® lanyard sheath.

READY EDGE

With a grip similar to the Para Edge™, the Ready Edge sports a smaller 2" spear point blade. The blade is double hollow ground with our distinctive serrated edge. It comes with a convenient lanyard sheath. Scuba Divers are using it, and it's become a favorite among fishermen in Alaska for cutting nets and heavy line.

THE TORPEDO

Heavy and perfectly balanced, the Torpedo is a lot of fun for target throwing. The double tapered points slide effortlessly from the hand for a perfect release with twice the sticking potential of a conventional throwing knife. The Torpedo is made from cold rolled 5150 steel, zone heat treated for maximum resistance to breakage.

MINI, SURE, & PRO FLIGHT THROWERS

We know you'll love the "professional style" of our Mini Flight, Sure Flight, and Pro Flight throwing knives. Because these knives have all the features you're looking for in a top quality thrower. Each knife is perfectly balanced for throwing and will accommodate either a blade or handle oriented throwing style. And, due to their super tough Carbon V® construction and durable black epoxy coat finish, they'll stand up to literally thousands of throws. They have incorporated into their design a strong, yet very sharp, Sure-Stick™ point that guarantees a hard hit and superb penetration every time.

TRUE FLIGHT THROWER

Sure, there are a lot of throwing knives on the market, but they all seem to be made out of cheap steel that bends or worse, stainless steel that breaks. That's why Cold Steel® made the True Flight Thrower.

Our True Flight Thrower beats the competition, hands down. We use our own exclusive Carbon V® Steel for a hard, yet resilient blade that will "bounce-back" from any throw. For versatility, we have given it a utility edge that will stand up to your toughest chores.

BAD AXE

The Bad Axe is made of medium carbon steel, over 2mm thick and fully heat treated. You'll find the Bad Axe is light enough to swing with one hand. Plus, its many points and edges make it ideal for target throwing competitions!

SPECIAL FORCES SHOVEL

Modeled after the original Soviet Spetznaz shovel carried by the most elite unit in the Soviet Army, our shovel head and socket are forged from medium carbon steel, then heat treated for maximum strength. The edges come sharpened to a utility/axe edge that can easily be made razor sharp.

Specifications: Bad Axe and Special Forces Shovel

Special Forces Shovel

DROP FORGED TOMAHAWKS

Our tomahawks are precision drop forged from medium carbon 5150 steel. During the forging process a metal ingot is heated almost white hot and then formed into shape in a series of progressive dies. During this forming process the steel is kneaded and compressed into a completely homogenous mass.

Like all good tomahawks, these are differentially heat treated. This means that the cutting edge and hammer face is fully hardened, while the balance of the head is left relatively soft to absorb the shock of striking blows.

Specifications: Drop Forged Tomahawks

	#90VT Vietnam	#90RH Rifleman's	#90F Frontier	#90N Norse
Primary Edge:	2 1/4"	3 1/2"	3 1/4"	4"
Overall:	13 1/2"	19"	19"	19"
Hawk:	8 1/2"	8 1/8"	5 1/2"	5 1/2"
Weight:	16 oz.	32 oz.	20.4 oz.	22.6 oz.

5150 Steel with American Hickory handle. Weights are approximate.

The Vietnam Tomahawk (90VT) comes with a leather, oxblood colored sheath.

VIETNAM TOMAHAWK

Like the historical Vietnam Tomahawk, our exact replica offers a wide, upswept primary edge for tremendous cutting and chopping potential. The secondary edge on the lower side of the head is specially curved and partially sharpened for both a cutting and hooking effect, and the "V" shaped spike on the back of the hawk head, make this an efficient implement for almost any situation.

Vietnam Tomahawk

Rifleman's Hawk

THE RIFLEMAN'S HAWK

This superb tomahawk features a factory honed cutting edge. It has two sticking points on its cutting edge for throwing and throws extremely well.

The Rifleman's Hawk has a traditional American hammer-head style butt for hammering stakes.

FRONTIER HAWK

The Cold Steel Frontier Hawk is our lightest and smallest tomahawk. Its light weight makes it a highly functional camp hatchet, while causing minimal fatigue to wrist, elbow and shoulder.

Frontier Hawk

Norse Hawk

NORSE HAWK

The Norse Hawk's 4" blade features a highly curved cutting edge and terminates in two sharp points. These points increase the chance of a stick when the Norse Hawk is thrown.

Bushman

Specifications: Bushman
#95BUS

Blade:	7"	Overall:	12 1/4"
Thick:	3/32"	Weight:	10.1 oz.

Cold forged SK-5 High Carbon Steel.
Includes a leather sheath. The sheath features a hard plastic liner for safety.

BUSHMAN

Unlike most hollow handle survival knives, the Bushman™ has no joint or seam between the blade and handle that requires a mechanical fastener. Instead, the Bushman's™ blade and integral handle have been expertly cold forged out of a single piece of 2.5mm thick SK-5 high carbon steel. The resulting knife has been heat treated and tempered to RC54 and when subjected to factory tests, has withstood over 2 tons of pressure on its blade/handle transition!

LATHI (LAH-TEE)

India is a society of over a billion people speaking hundreds of different dialects and worshipping through a multitude of religions.

Strife and civil disorder can flare up and often the only defense against anarchy is the Indian police, who rely on one main weapon in crowd control... A four foot long Lathi! Issued as standard equipment, the reason for the Lathi's popularity as a crowd control device is its versatility and non-lethal effectiveness.

Four feet, is the standard police length in India, a good practical sized Lathi.

At **six feet**, the Lathi becomes an excellent hiking or camping staff. In fact it has sufficient length so that it can be cut to exactly fit the user. With the bark left on these sticks they are virtually impervious to the elements.

Our **Three Foot Training Stick**, made out of the same tough rattan as our Police Lathi, is approximately three feet long and is three quarters to one inch in diameter.

Anyone who has difficulty in walking, maintaining their balance, traversing rough, hilly terrain, or suffers from back, knee, or hip pain will benefit from the **Crook Top Cane**. It's stylish and sturdy and will provide support wherever you go.

Specifications: Rattan Sticks

Weight:	10.7oz.	13.7oz.	1lb. 3 oz.	2lb. 2.7 oz

All weights and measures for sticks are approximations.

A word about rattan...

Despite its resemblance to bamboo, Rattan is not hollow. It is composed of thousands of tough, thin fibers that are densely packed together and encased in a smooth hard skin. This construction gives it enormous strength and substantial flexibility. Rattan sticks flex rather than break. So when they strike hard objects, they absorb shock rather than transfer it to the user. The bark is left on because it adds tremendous strength to the rattan. In fact, when combined with the fiber core, it is tough enough to offer good defense against even edged weapons. Our Lathis are made of select Rattan of the highest quality. They are picked for us by one of the major suppliers of Lathis to the Indian Government.

THE BLOW OF THE RATTAN

In cooperation with Windlass Steel Crafts, we present our video on the history and use of the Lathi throughout India. Shot by professional film makers in color, this superb quality, 60 minute video will give an in depth look at how to use a Lathi. There are numerous demonstrations and competitions, and a good overview of other unique and effective Indian weaponry. (#VBOR)

SPEARS

Specifications: Spears

	#95DL Javelin	#95F Assegai Short Shaft	#95E Assegai Long Shaft	#95BOR Boar Spear
Overall:	5 ft. 9"	3 ft.	6 ft.	6 ft. 10 1/8"

Overall:	27.9oz.	21.9oz.	38.1oz.	68oz.
Wide:	1 7/8"	2 1/2"	2 1/2"	3"

A leather sheath is available for the Assegai (#S95AS), the Javelin (#S95JSU), and the Boar Spear (#SL95BOA). Each is sold separately.

For people who have everything, here's something new! Our spears make for a unique, and athletic target throwing experience!

Available in a variety of sizes, with Premium American Ash shafts, all Cold Steel® spears are made from SK-5 Medium Carbon Steel.

Using cold forging technology, pioneered by Cold Steel,® we can offer high performance at reasonable prices. Like traditional spear heads, ours are heat treated and then drawn to a tough spring temper. The concept is that the spear head should flex or bend under impact stresses rather than break.

The Boar Spear, is a modern re-creation of a design that dates back to the European Renaissance. It is cold forged out of medium carbon SK-5 Steel and, like our other spears, is heat treated to a spring temper. The Boar Spear comes with an extra stout premium ash shaft.

The Assegai, invented by the legendary Zulu king Shaka in the early 1800's, revolutionized tribal warfare in Southern Africa. Our version is available with your choice of two different shaft lengths.

The Javelin, is a superb throwing spear! With its light head, it sails through the air with minimal effort.

WALKABOUT

Every culture in human experience has utilized a walking stick in one form or another. In homage to this tradition, and to provide you with a quality tool, Cold Steel® presents the Walkabout.

The Walkabout is made in the United States from second growth hickory (no other American hardwood is better suited to this purpose) specially selected to be free of knots or flaws.

Each is lathe turned from a 3" hickory blank which is then carefully sanded and "flamed" for visual appeal, and then coated in clear polyurethane to protect it from the elements.

With a length of approximately 37", a weight of 20-22 ounces, and a 2" knob thickness, the Walkabout provides a sturdy balancing aid for traversing rough, slippery or uneven ground.

Every Walkabout comes complete with a brass-plated, steel ferrule. This helps to protect the stick from the excessive wear it will encounter on rough urban streets and concrete sidewalks.

Specifications:

#91WAC Walkabout Cane	
Length:	38"
Diameter:	1 7/8" tapered to 1"
Material:	Hickory
Weight:	21oz.

Specifications: Sjambok

#95SAS 36" Sjambok
 #95SA 41" Sjambok
 #95SAXL 54" Sjambok

Extruded virgin black plastic.
 Diameter at butt: 1"
 Diameter at tip: 3/8"

SJAMBOK

In Africa, the Sjambok is a cattle prod, a whip, a riding crop and a means of self protection. Its considerable reach, lightning speed and devastating impact have also built it quite a reputation as a sure defense against deadly snakes.

And since the Sjambok is swung like a rod, not cracked like a bull whip, its weight, speed and flexibility does all the work and little physical strength is required.

SYNTHETIC SJAMBOKS

Our Sjamboks are made from precision molded black plastic. They are the same kind used by the South African Police.

The CAT Tanto and Delta Dart have just been banned in California. Please call for availability.

CAT Tanto

Delta Dart

ZYTEL KNIVES

Made from 43% glass-filled Zytel® nylon which has been UV and heat stabilized to be impervious to the elements. The ratio of glass to nylon is the highest available, making points tougher, longer lasting and easy to re-sharpen with a nail file.

CAT TANTO

The CAT Tanto is a Zytel® reproduction of Cold Steel's® original Tanto! It shares all of the design features that made the Tanto so popular, including the sure-grip handle shape and reinforced point.

DELTA DART

The Delta Dart is 8 inches long and a half inch in diameter, yet it weighs only seven tenths of an ounce! The comfortable handle is knurled for a positive grip.

Specifications:

CAT Tanto/Delta Dart

#92CAT #92DD
 CAT Tanto Delta Dart

Thick: 1 1/64" 1/2"

Weight: 3.2oz. 0.7oz.

A Concealex™ neck sheath is available for the Delta Dart (#SK92DD). Sold Separately.

1917 CUTLASS

Our modern re-creation of this classic fighting sword is as authentic as possible. The 1917 Cutlass features the signature 1 1/4" wide curved blade with a short clipped point. It's sharp, yet sturdy enough to resist bending or breaking.

Just like the original, our version features a half basket guard stamped out of heavy 18-gauge carbon steel and blued (to resist rust) to match the blade. The handle is fashioned from carefully shaped hardwood painted brown and secured to the full tang by three heavy brass cutler's rivets. The reproduction scabbard is made entirely of high quality leather, brass and copper.

Specifications:

1917 Cutlass #88CS

Includes leather scabbard. (left)

APPAREL

Show off to the world! You know who makes the best knives! We now have a variety of apparel items for almost any occasion.

"SWORDSMAN" TEE SHIRT

The Cold Steel® "Swordsman" 100% cotton Tee features a classic Samurai figure! The Kanji characters meaning "Master Bladesmith" are on the front and back of the shirt.

BASIC BLACK TEE

This jet-black tee comes with the distinctive Cold Steel® logo with the phrase "World's Strongest Sharpest Knives."™ Like our Swordsman shirt, this Tee is 100% pre-shrunk, extra heavy cotton.

COLD STEEL® HAT

Tell 'em you love Cold Steel® with this premium quality hat! The sturdy, black cotton/polyester twill makes this hat both handsome and comfortable! The embroidered design has the Cold Steel® logo with the phrase "World's Strongest, Sharpest Knives."™ This hat features a "one size fits all" adjustment band on back for a good fit.

POLO SHIRTS

Our Polo-styled shirts are available in white or navy blue and come with our distinctive logo embroidered on the left side of the chest. As an added feature, we have included an embroidered image of our Tanto just above the cuff of the left sleeve. 100% cotton pique, clean finished three-button placket, welt collar and cuffs with woodtone buttons.

20TH ANNIVERSARY 1980 - 2000

THE YEAR 2000 MARKS THE 20TH ANNIVERSARY OF THE FOUNDING OF COLD STEEL, INCORPORATED. A COMPANY DEDICATED TO MAKING THE STRONGEST, SHARPEST KNIVES IN THE WORLD.

OVER THE LAST TWO DECADES, COLD STEEL HAS BEEN AT THE FOREFRONT OF THE MANY INNOVATIONS THAT HAVE HELPED TO DEFINE THE KNIFE INDUSTRY AS A WHOLE. PROGRESSIVE ACCOMPLISHMENTS, INCLUDING THE INTRODUCTION OF CHECKERED KRATON[®] HANDLES, AND THE TANTO POINT BLADE STYLE HAVE GONE FROM CURIOUSLY INTERESTING FEATURES TO INDUSTRY-WIDE HALLMARKS OF QUALITY AND SOPHISTICATION.

NEW GROUND WAS ALSO BROKEN WITH THE INTRODUCTION OF UNIQUE NEW BLADE STEELS LIKE CARBON V[®] AND SAN MAI III.[®] CARBON V[®] FOR EXAMPLE, HAS NEVER BEEN EQUALLED BY ANY OF COLD STEEL'S COMPETITOR'S AND NOTHING THEY HAVE PRODUCED YET HAS BEEN PROVEN TO OUTPERFORM IT.

OF COURSE COLD STEEL WILL ALWAYS LOOK TO THE FUTURE, CONSTANTLY STRIVING TO MAKE THE WORLD'S STRONGEST, SHARPEST KNIVES. THAT GOAL, AS ELUSIVE AND DIFFICULT TO ACHIEVE AS IT IS, HAS BEEN THE SAME FOR THE PAST TWENTY YEARS.

COLD STEEL[®]
