

# Kershaw

## Blade Traders

**Now the most versatile cutlery tool ever made is better than ever!**

1994

## DELUXE BLADE TRADER

**MODEL 1099DBT** Includes TaskMaster 2 Handle and padded Cordura Storage Container with Blade Case and the following Six Blades: BT5- 6" Saw (top); BT7- 6" Carving; BT8- 6" Bread; BT2- 6" Fillet; BT4- 4" Serrated Utility; and, BT6- 6" Cook's.

## SPORTSMAN'S BLADE

**MODEL 1095SBT** Includes TaskMaster 2 Handle and padded Cordura Storage Container with Blade Case and the following Two Blades: BT2- 6" Fillet (top); BT5- 6" Saw.

***The New TaskMaster 2 Handle is "Hand-Print" contoured to assure a safe, secure grip & minimize fatigue — and it conceals the core of every Blade Trader.***

With Kershaw's Blade Traders — the most versatile concept in cutlery ever devised — you can change blades securely, safely, and quickly. These new Blade Traders feature Kershaw's TaskMaster 2™ Handle with an ingenious internal blade-locking mechanism, plus generous assortments of new premium-grade stainless steel blades that anticipate the needs of every hunter, angler, hiker, camper, explorer, and traveller!

The attractive new double-injected TaskMaster 2 Handle is Kershaw's best ever — it's ergonomic shape offers better control and more cushioned comfort. Yet this handle with a velvet-soft feel and non-slip grip stands up to the task: It's tough (and dishwasher-proof).

Concealed inside (at the bolster) is Kershaw's exclusive Quik-Lock™ mechanism that allows you easily to secure and lock any of the interchangeable "shaving sharp" high-carbon stainless steel blades — or the incredible new saw blade that puts a "chainsaw" in your hand!

Check out the features, design, and new scabbards (padded container for the Deluxe Blade Trader), and you'll know there's more quality, performance, and value than ever in Kershaw's attractive and durable new Blade Traders.

## TRADER

TaskMaster 2 Handle and Cordura  
and the following Three Blades:  
BT3- 3½" Hunting.

## FISHERMAN'S BLADE TRADER

MODEL 1096FBT Includes TaskMaster 2 Handle and Cordura  
Belt Scabbard with Blade Case and the following Three Blades:  
BT4- 4" Serrated Utility (*top*); BT1- 5" Fillet; and, BT2- 6" Fillet.

Quik-Lock "Bowtie" Mount Firmly Secures  
Blades — Even After Years of Use!

*Quik-Lock  
Mechanism  
in the Handle  
Makes Entire Blade  
Useable — and Improves  
Balance and Control, too!*

## Quik-Lock Handle Eliminates Flange

Kershaw's Quik-Lock mechanism is built into the handle of every Blade Trader to eliminate any exposed lock flange that can hinder your work. This allows use of the entire length of the blade for cutting and makes the Blade Trader more compact, too. You get improved balance with any of the blades. That means more control. This new design allows the Quik-Lock to secure each blade firmly and safely than ever before.

It takes just a few seconds to slip a blade from its protective liner. To remove the blade, seat it on the Quik-Lock blade mount, close the handle and go to work.

## Maximum cutting power in a sawblade! Ideal for hunting, fishing, & camping, it's perfect for home and yard, too. A great bone saw.

Perhaps you've seen small handsaws before, but there has never been one like Kershaw's Blade Trader Saw Blade! This special hard chromium-plated saw blade has a patented tooth design that "planes" through wood for easier cutting (much like a chainsaw) with a minimum of resistance, blade "grabbing," and effort. In fact, the blade is designed on the same principle as chainsaw teeth. Because it cuts on the *pull* stroke, rather than the push stroke, it assures an improved, straighter and cleaner cut with much less fatigue.

The Blade Trader Saw Blade sharpens easily with Kershaw's Edge-Tek Blade Sharpener for all knife blades and cutting tools (Model 2525).

*Unique sawtooth  
design of Kershaw's Blade Trader  
Saw Blade powers through wood quickly — and stays sharp longer.*

## HUNTER'S BLADE TRADER

**MODEL 1094HBT** Includes TaskMaster 2 Handle and Cordura Belt Scabbard with Blade Liners and the following Two Blades: BT5- 6" Saw (*top*); and, BT3- 3½" Hunting.

# VALUE PACKED BLADE TRADERS

The multiple-blade products of choice around the world, they are the ideal cutlery solution for home, on the road, off the road, and on the water. Now with its rugged, yet velvet-soft TaskMaster 2 handle and concealed Quik-Lock mount, new blade storage, and a wide selection of blades for every cutting, slicing, and chopping task, your choice of Kershaw Blade Trader is the perfect companion — in the kitchen or campsite!

Every model of Kershaw's new Blade Traders includes a rugged double-stitched Cordura® carrier for convenient storage, as well as field use. The Deluxe Blade Trader (*top left*) has a padded container. The Sportsman's Blade Trader (*top right*) and Fisherman's Blade Trader (*lower left*) feature belt scabbards, and the Hunter's Blade Trader (*right*) has a belt sheath.

## NEW FILLET KNIVES

### TaskMaster 2 Fillet Knives

New Kershaw Clearwater TaskMaster 2 Fillet Knives bring all the benefits of the new handle material and design originally developed for field knives— including improved comfort (and less fatigue) with a cushioned, non-slip grip and added control with the contoured “hand-print” shape. The properties that resist slipping can be especially important when cleaning fish.

### Floating Fillet Knives

**THESE KNIVES FLOAT!** Drop a Kershaw Clearwater Floating Fillet Knife in the water, and it floats on the surface. They're ideal for use on-water or off. The textured two-color handle is easy to see in all water conditions, and it allows a solid, firm grip. You'll never lose another knife to King Neptune!

All Kershaw Fillet Knives are famous for the quality of their blades, because all Kershaw fish fillet blades are made of premium-grade stainless steel — flexible for exacting work, shaped especially for filleting fish, and honed to Kershaw's famous “shaving sharp” edge. That's why Kershaw's Clearwater Fillet Knives are endorsed by pro staff and experienced anglers everywhere!

CLEARwater

**Model 1269** (*Not shown*) Textured Floating Handle, 9¼" (23.3cm) Blade; 14¾" (37.5cm) Overall. Includes Molded Belt Sheath.

## NEW SHEATH HUNTERS

### **Stainless Steel Bolsters the Appearance and Durability of these New TaskMaster Sheath Hunting Knives**

A rugged new TaskMaster handle design — developed from Kershaw's ergonomic "hand-print" concept — with a new stainless steel guard serves as the foundation for three of Kershaw's most popular hunting blade shapes. But even though the handle— contoured to assure a secure, comfortable grip and minimize fatigue — is most attractive in appearance, these new sheath knives are rugged and designed for field use. The TaskMaster handle, itself, is incredibly tough, and it's famous for its non-slip grip, regardless of conditions.

The blades, of course, are made of Kershaw's famous high-carbon stainless steel— a special alloy that sharpens well— honed to Kershaw's enviable "shaving sharp" edge. These blade shapes have been field-tested for material strength, performance and durability.

Talk about stout! These new Sheath Hunters are "built to handle the hunt," and you can put 'em to the task anytime, anywhere.

#### **ROUGHNECK 2 (Top)**
