	PRESS ROOM. Blades are blanked from Tool Steel. The grain of the Steel running the length of the blade insures resiliency and edge-holding qualities. Springs and linings are blanked with precision dies.		ASSEMBLY DEPARTMENT. Blades, springs and covers are carefully assembled with precise care . . . the unfinished knife blades eased into place and springs fitted and tested for strength.		EDGING DEPARTMENT. Blades of the knife are HAND-HONED and edged by experts who bring to Scapel sharpness the Long-Lasting cutting edge of a Schrade-Walden blade.
	HEAT-TREATING. Blades and springs are electronically tempered and hardened so that the SCHRADE-WALDEN Custom-Made knives give a lifetime of service.		SCHRADE-WALDEN "MASTER CUTLERS". Many third and fourth generation artisans, test each blade making sure blades "click" open and closed; fall in alignment; easy to open and accessible for instant use.		CLEANING AND WIPING DEPARTMENT. Knives are "laundered" wiped clean by hand, oiled and made ready for final inspection.
	GRINDING. Experts taper each blade vertically and horizontally so that it can be made razor-sharp and "Everlastingly Sharp."		FINISHING DEPARTMENT. Blades are finely glazed by hand and the large blade of most knives highly polished by hand on the nail marked side preparing them for the Razor Sharp Schrade-Walden Edge.		INSPECTING AND WRAPPING DEPARTMENT. Here the knife is rechecked for the "click" test. Knives are checked for blade alignment and ease of operation . . . made sure every SCHRADE-WALDEN knife is a MASTERPIECE.
	MATCHING-ON. Stag, Pearl or Plastic handles are firmly riveted to the sides of the knife . . . each handle perfectly fitted by hand.		HAFTING ROOM. Ends and backs of knives are made smooth and shiny and the knife itself made comfortable to handle.		SHIPPING and STOCK ROOM. Final check is made of the number of knives, appropriate weights and boxing for shipment to the SCHRADE-WALDEN distributors.

NAMES AND SHAPES OF BLADES

To get long satisfactory service from your knife, follow these simple instructions.

Occasionally oil joints with light machine oil. Wipe knife after use to prevent rusting.

1. To sharpen, raise back of blade about 1/8" above stone.
2. Sharpen against the edge moving the blade toward you.
3. On every other stroke sharpen other side of edge, going the other way on the stone.

Schrade-Walden Sampler Knives

Made in U.S.A.

These knives are hand made to meet strict specifications. The blades have sufficient length to cut very large samples without difficulty. Every blade is made of High Carbon Stainless Cutlery Steel, and is heat treated and tempered to insure its edge holding quality. Each blade is skillfully ground and sharpened by hand. A most effective advertising medium with your slogan or trademark deep hot stamped on the handle. They are excellent Good Will builders and of permanent value to you.
