

Creators of Extraordinary Tools & Blades

The human eye can distinguish the essential from the non-essential, the aimful from the arbitrary. The beauty of a SOG design is in its purpose.

Some manufacturers simply produce knives. At SOG, we create style through craftsmanship. Our purpose is to combine advanced technology, imaginative designs, and quality construction to create products of the highest caliber—products that enhance your life. This is the philosophy you share with us each time you choose a SOG product.

SOG stands for Studies and Observation Group, an elite joint services military group in Vietnam designed for covert operations. Sanctioned to develop and purchase their own equipment, SOG created a knife for use in one of the harshest environments in the world. It is in this spirit that SOG Specialty Knives and Tools, Inc. was founded several years later by Spencer and Gloria Frazer.

Spencer Frazer is the design force behind all SOG products, guaranteeing a consistent style and design from start to finish. *“My greatest pleasure is seeing my products in use—products that started from an idea, developed to a drawing, progressed to a model, and finally finished in production. I design products that I like and want to use myself. With a diversified background, including work on top secret aerospace designs, my tastes run from timeless to high-tech. Attention to detail and style is very important to my eye. The racing curve of a knife grind, the similarity of a blade tip to a shark tooth, the way light streams through the hole pattern in our tool handles—all exemplify SOG.*

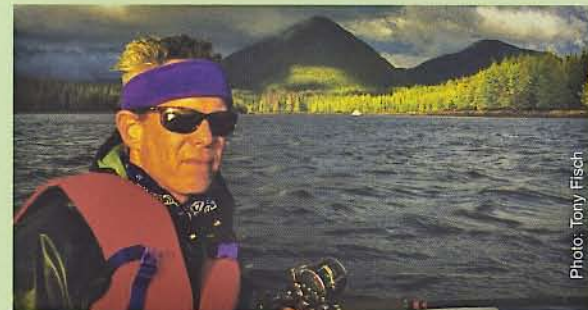

Photo: Tony Fisch

**I consider myself an artist and sculptor,
an outdoorsman and craftsman.**

-Spencer Frazer

Some designers are only concerned with the way something looks, some only with the way a product works. I consider both style and function equally important when envisioning a product, leading to some of the most interesting designs and inventions in the industry. How a product feels in your hand and how it moves are as important as other aspects. The click of the lock, the swoosh of the blade opening, the quiet cut of a perfect edge—all are the final curtain call of total performance. In other words, the details are what tell our customers we did everything right.”

Today, SOG products are sold to satisfied customers throughout the world. SOG is renowned for sharpness—the most fundamental aspect of a blade. Over the years customers have recognized this quality in our blades, coining the term “SOG Sharp.” We believe that a knife and tool are essential equipment for modern life. These are just some of the comments we’ve received from customers who feel the same.

“SOG hasn’t missed a trick in the design, execution or finish of this wonderful multi-purpose tool. I own all of the leading folding multi-tools on the market, and the SOG is far superior to any of them. The attention to detail just isn’t there in the others. I cannot find a single flaw. This is the first time I have ever given a score of 100%.”

-Louis Coffin Reno, Nevada.

Creators of Extraordinary

“The reason I’m writing this note is that I would like to assure you of the high esteem in which I hold your blades. At this time of writing I own an AirSog, a SogTech, and a Pentagon model, and I am deeply satisfied with their performance. Thank you for manufacturing these excellent pieces of cutlery. Keep up the good work.”

-Gyula Vinczeller Budapest

“I bought a MagnaDot serrated knife before I went to Thailand for a 3 week expedition to the hill tribes in the north. Your knife is the best that I ever had!”

-Al Matz Germany

“I love your knives. I flat out refuse to buy any other brand!”

-Chris Barnett

"I love your products. Though your company is not very old, it has a reputation for quality. The saw on your tools cut through a military lock when an emergency arose while deployed in Bosnia. Thank you for quality American products."

-Sgt. Duncan Task Force Eagle

"I have used the Paratool for a few weeks now, and all I can tell you is that it is a wonderful tool. As an officer in the Swedish Engineer Troops, I use it hard and often."

-Magnus Stridh Eksjo, Sweden

in a SOG Tools & Blades

"I am seldom inclined to promote any particular product, but I am so impressed with the broad range of utility of my Power Plier that I am compelled to write to you. Last summer my son and I travelled to the British Isles and spent 5 weeks on bicycle touring. From the moment we landed and had to assemble our

bikes to the evening before departure when my son required pulling of a bothersome loose baby tooth, the SOG was invaluable. It became affectionately known as 'The SOG'. I suppose you could say I've become addicted. Thank you so much."

-John Snively British Columbia

PowerLock

PowerPlier Series

Compound leverage has become a SOG patented trademark for folding tools. With the same hand pressure you will generate twice the wire cutting and gripping power than all other conventional designs. The PowerPlier series uses our interlocking gear design, allowing the pliers to be easily opened and closed with a one-handed flip of the wrist. SOG's hex bolt construction allows the greatest versatility to change components and adjust your tool. All tools are stainless steel, available with a black oxide finish, and made in the USA.

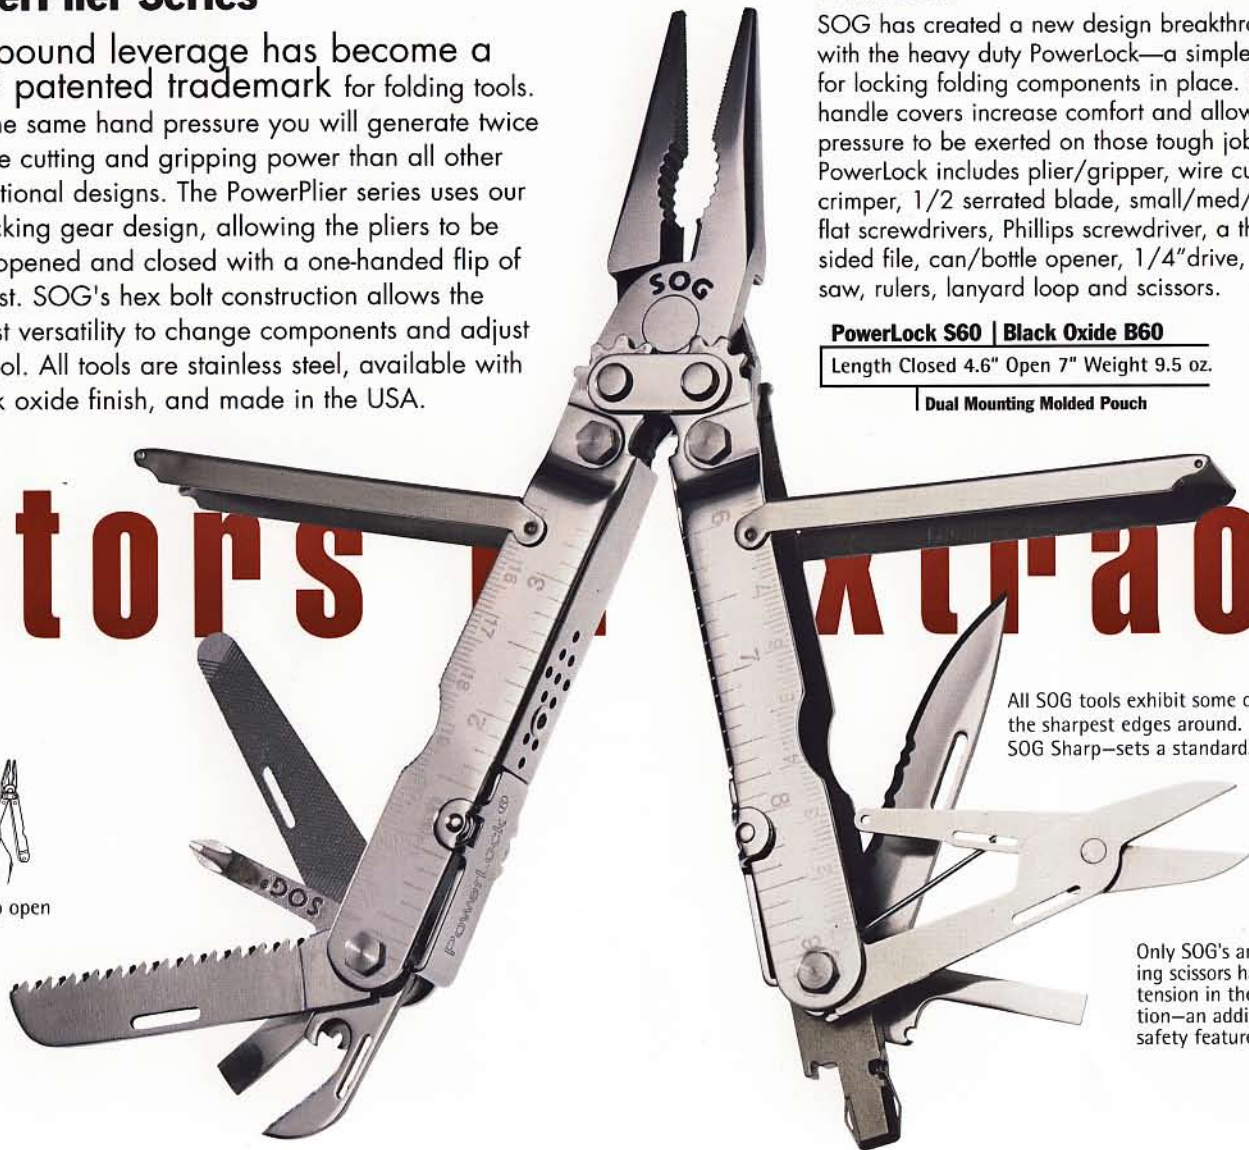

PowerPlier

Pocket PowerPlier

One-handed flip open

PowerLock

SOG has created a new design breakthrough with the heavy duty PowerLock—a simple system for locking folding components in place. Pivoting handle covers increase comfort and allow more pressure to be exerted on those tough jobs. The PowerLock includes plier/gripper, wire cutter, crimper, 1/2 serrated blade, small/med/large flat screwdrivers, Phillips screwdriver, a three-sided file, can/bottle opener, 1/4" drive, wood saw, rulers, lanyard loop and scissors.

CrossCut and CrossGrip

The CrossCut and CrossGrip are precision instruments for cutting, gripping, personal care, and the unexpected. SOG's gear-driven compound leverage allows big-sized cutting power to be truly miniaturized. They are the smallest compound leverage tools ever designed. Open the handles of these micro machines, and springloaded scissors or pliers are ready to work for you. Wait until you feel the action.

CrossGrip

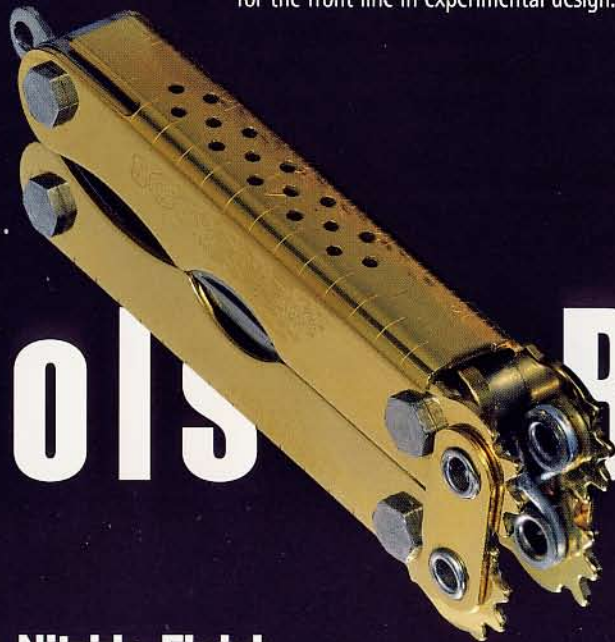

CrossGrip features plier/gripper/wire cutter, full size tweezers, small and medium screwdrivers, bottle opener, nail file/cleaner, Phillips screwdriver, ruler, lanyard ring and black pouch. All stainless steel.

The Paratool

The Paratool is the only tool in the world with angled plier head capability. The unique, patented way the Paratool opens creates smooth comfort grip handles as well as the ability to operate at a variety of angles (140°-180°)—indispensable in tight spots. The comfort grip handles are smooth on the outside and feature SOG's classic ventilation holes for maximum gripping. Be prepared with the Paratool.

10 Creators of Extraordinary Tools & Blades

Toolclips

The Toolclips are compact tool chests that can be carried and attached to a pocket, belt, pack, or a variety of mounts. They showcase pliers, grippers, and wire cutters that can be smoothly accessed and operated by one hand. A Toolclip is the only choice when big blade size is a requirement. Like all SOG products, the spearpoint and serrated blades will hold an edge and are extremely sharp. The pry bar is indispensable when opening covers, untying heavy knots or simply getting into tight corners.

Toolclip S23

Toolclip includes plier/gripper, wire cutter, spearpoint blade, serrated blade, small and medium screwdrivers, wire stripper, bottle opener, and pry bar.

Length 5.25" Weight 7 oz. All Stainless Steel

AutoClip Series

The lightweight AutoClip series features the only knives in the world with adjustable tension pocket clips. This patented device is easily operated with a quick turn thumb wheel, allowing you to adjust your AutoClip to a thick belt, thin pocket, or to be virtually locked on for extended carry. AutoClip also contains a thumb slot for easy, one-handed opening. Lightweight Zytel handles feature a cleverly woven texture for a secure, no-slip grip.

High-End Folders

These classic large blade lock-backs have become the standard from which all other large folding knives are judged. The Tomcat electrified the industry by winning the *Overall Knife of the Year Award* with the first modified bowie-style blade in a folder. The Tomcat, Stingray, and Sogwinders have the thickest blades in folding knives. Coupled with welded stainless steel bolsters and Kraton aggressive checkered handles, they are continually sought after.

Designer Series

We have taken the skin of the Stealth Bomber, added titanium, and fused them with the finest custom steels to launch the JetEdge and Vision as the next generation of SOG folding knives.

JetEdge

The JetEdge series is an unmistakable SOG evolution in blade design. These fascinating and stylish hybrid folding knives combine a liner-type lock, ATS-34 steel, and carbon fiber handles. The JetEdges' half-serrated, ATS-34 blades are surgically sharp, with excellent edge holding, toughness, and hardness. The JetEdge showcases new grind lines along with a shark tooth tip which generates exceptional point strength. SOG's preferred opening slot fits within the contours of the blade and provides quick one-handed opening. A scalloped thumb rest increases downward pressure and offers delicate tip control for precision work.

Creators of Extraordinary Tools & Blades

Vision

Rotating out of a space age titanium handle is the radical blade of the Vision. This powerful knife was made for extreme conditions. The geometric grind lines focus power on the edge and tip of the ATS-34 polished blade. Completely corrosion proof, the titanium handle is lightweight like aluminum but as strong as steel. Other features include a dual thumb stud, liner-type lock, and lightweight clip.

Pentagon Series

Serious multi-edge capability has made the Pentagon one of the industry standards in tactical cutlery. SOG was the first to offer a production knife with this innovation. The Pentagon Elite builds on this tradition in an exciting new folding format.

Pentagon Elite

The Pentagon Elite's new technical design contains hardware elements that include: a checkered liner lock release, a reversible military style clip, ambidextrous slotted thumb studs, and machine screw construction. A low-reflective, beadblasted blade and clip. Spearheading the Elite is a shark tooth tip that increases point strength.

Seal Knife Series

After surviving one of the most extensive testing and evaluation programs ever undertaken by the U.S. Government that included knives from most U.S. cutlery manufacturers, the SOG Seal Knife 2000 triumphed, becoming the official Navy SEAL knife. The SEALs are one of the most specialized elite military groups in the world today. SEALs must undergo one of the most rigorous training programs devised to produce the consummate warrior. Only a select few endure and earn the right to wear the SEAL Trident on their uniform.

Seal Pup

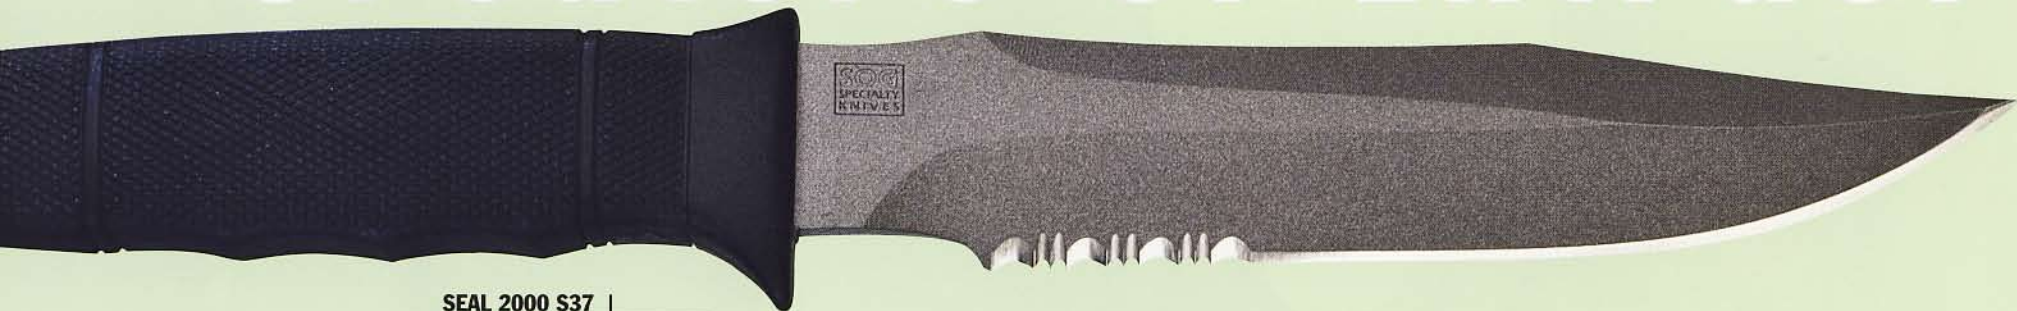

The Seal Pup is the mini rendition of the official Navy SEAL knife. This stowable blade offers the same durability and performance and is an excellent field companion for outdoor and underwater adventures.

in a...s & Blades

SOG Kydex sheaths are designed to be tough in all types of weather and environments. Able to be mounted upside down, sideways on a belt, or strapped to an ankle, these futuristic scabbards use a friction fit as well as a back-up nylon strap for knife retention.

Now available for the civilian market in several sizes, you can be assured that the SEALs have done their homework, so you don't have to!

Fixed Blades

This diverse group of working knives all share common traits. Tough and dependable with non-slip Kraton handles, the different blade styles are as much a choice in style as they are in function. You can be assured that all come from our factory with SOG's world famous sharpness and are designed with balance and comfort in mind. Just look at the tight fit between the blades and crossguards, and you will see quality construction.

Desert Dagger

The SOG Desert Dagger was originally requested by military personnel. With three different edge combinations, it is designed to provide an expanded capability over conventional double-edge knives. With the same handle construction as the Government, we feel the DD is worthy to be carried on any front in the world.
